house owner. Based on forensic analysis, this illustration depicts the Cerro El Plomo (5240 m) high in the Andes during an Inca Capacocha, his head lowered as a ritual officer last raises a blunt weapon. Capacocha involved children and youths who authorized pilgrimages and were ritually offered in mountains or lacuna. Kim Price et al., and C2 imaging, *Scientific Reports*, 2026.

FOCUS

Repeat offenders: Satellite DNA sequence variation drives heterochromatin instability
BY STEFFIE A. ELLIS, PAUL C. MINOTTI, SHARON A. CAMPE, MARIA E. GUERRERO, ANNA C. CHAN, MARIA E. GUERRERO, ANNA C. CHAN, ELIZABETH A. HOBBS, ANDREW J. SHARP, MARTHA L. BULYK
SCIENCE ADVANCES | 10 JUL 2026 | 12 pages
RELATED RESEARCH ARTICLE
Human DNA sequence dictates pericentromere heterochromatin formation and function
BY YONG LIANG, ZE-HAO WANG, YUE LI, ... SCIENCE ADVANCES | 10 JUL 2026

SOCIAL AND INTERDISCIPLINARY SCIENCES AND PUBLIC HEALTH

Tailored forecasting from short time series via meta-learning
BY OLUSOLA A. ODUSOTE, ZHANQI CHI, ADAM P. VIGNERON, BRIAN C. VISS, MAUREEN A. SPENCER ... 17 JUL 2026 | 9 pages
Meta-learning across related dynamical systems enables accurate forecasts from short signals.
ABSTRACT →
Pilgrimage to sacrifice: Mechanisms, causes, and time of death of the Western Andean Capacocha of the Southern Tawantinsuyu
BY STEFFIE A. ELLIS, PAUL C. MINOTTI, SHARON A. CAMPE, MARIA E. GUERRERO, ANNA C. CHAN, ELIZABETH A. HOBBS, ANDREW J. SHARP, MARTHA L. BULYK
SCIENCE ADVANCES | 10 JUL 2026 | 12 pages
Multimaterial chest wear pilgrimage commemorating children death, and reflect Western Andean Capacocha ritual in Chile
ABSTRACT →
When trust building looks like surveillance: Public polarization toward Chicago policing
BY CHRI CAMPBELL, ANTHONY F. ... 10 JUL 2026 | 9 pages
Experimental exposure to a police-issue building initiative widened gaps in police trust and support for racial equity policies.
ABSTRACT →
Editorial and peer review dynamics at elite general science journals
BY DANIEL MALICKI, ANDREW A. SIEGEL, JONATHAN PEDLOW, DREW A. SWANKOSKI, ALEXIS LUCATTI ... 10 JUL 2026 | 12 pages
Analysis of desk-reject data and sample interactions that quietly exercise or alter general science journals.
ABSTRACT →
Maize-based polyculture, not monoculture, sustained precolonial societies in the Brazilian Cerrado
BY ELIZABETH SIMON, A. SUMMERS, ERIC G. FOWLER, ANNA CHAUTZ, STEFFI ANDRE, ANNA KOZAK, ZOE SCOTT, DAVI I. MEDEIROS, JOHN LOY, DAVIS MCCALLA, ANNA C. CHAN ... 3 JUL 2026 | 9 pages
Evidence from human bones highlights complexity of austere food production among precolonial societies in eastern South America.
ABSTRACT →

NEUROSCIENCE

Various projection axtreuytes: Conserved reactive cells in brain pathology
BY CONSTANZA VIDAL, DAVID TOTTERS, ARMAN KAMPAL, SABINE ANGELI, DIMITRI GOPANDRAKOPULOS, MAXIMILIAN PRUCKNER, CARMEN SCHMITT, MARTA CONCALVES, MARTA, CONCALVES, MARTA, ANDREA, CASTRATTIA, GIULIANA, ... 2 SEPTEMBER 2025 | 12 pages
Various projection axtreuytes emerge as a conserved reactive phenotype linked to inflammation and brain pathology.
ABSTRACT →
Reversed functional gradient in primate prefrontal cortex: Posterior dominance and frontoparietal task-related deactivation
BUCK MARCHAND, MARIA MARCHAND, MARTIN MARCHAND ... 17 JUL 2026 | 9 pages
Single-neuron mapping Flap prefrontal hierarchy, placing adaptive control posteriorly and frontoparietal cortex on task engaging.
ABSTRACT →
Linking functional and structural dendritic spine remodeling during fear learning and extinction in vivo
BY MAXIMILIAN A. LUDT, MARCO ROSSNER, ANDREAS ZIM, OF MUNICH, CHRISTIAN MAY ... 17 JUL 2026 | 9 pages
Fear learning and extinction bidirectionally modulate dendritic spines' remodeling that contributes to dendritic processing.
ABSTRACT →
Functional segregation in Parkinson's disease
BY ANNA MARIA BONDA, ALESSANDRO MARIANI, ANTONIO PISANI, GIULIA MARCELLO, MONICA CHIOSTRI, LUCIANO MARCHI, GIANLUCA CALABRESI, ANTONIO PISANI, GIULIA MARCELLO, MONICA CHIOSTRI, LUCIANO MARCHI, GIANLUCA CALABRESI ... 17 JUL 2026 | 9 pages
Task-evoked dopamine imaging reveals compartmentalized of striatomotor signaling in Parkinson's disease.
ABSTRACT →
A neuromotoneuron $Na_V1.8$ channelopathy underlies a genetic subtype of primary idiopathic hyperhidrosis
BY CLEMENS GAMBER, ALEX MARCO FRANCIS, MONICA CATALDO, ALISON MAGUIRE, CLEMENS GAMBER, ALEX MARCO FRANCIS, MONICA CATALDO, ALISON MAGUIRE, CLEMENS GAMBER, ALEX MARCO FRANCIS, MONICA CATALDO, ALISON MAGUIRE, CLEMENS GAMBER, ... 2 JUL 2026 | 12 pages
A genetically defined Na_V-channelopathy underlies primary idiopathic hyperhidrosis as a targetable neuromuscular disorder.
ABSTRACT →

THIS WEEK'S PODCAST

14 JUL 2026 | BY CHAN CHEUNG, ALI CHARLES, STEVE MOSS
Health care in Malawi after USAID's end, and Pluto's gas remained with an atmosphere
00:00 / 00:00 | 1X

PHYSICAL AND MATERIALS SCIENCES

Opposite and reversible optical switching in soft-lattice halide perovskites using light and heat
BY DONGHO KIM, JUNGHYUN HAN, ... 10 JUL 2026 | 9 pages
Soft lattice single-crystal halide perovskites enable broadband, infrared-optical switching directly light or heat.
ABSTRACT →
Direct characterization of quantum dynamics via generalized weak values
BY JAEHEE YIM, YOU-LI DING, JAEHEE YIM, YOU-LI DING, JAEHEE YIM, YOU-LI DING ... 17 JUL 2026 | 9 pages
Process weak values provide a direct window into the experimental characterization of quantum processes.
ABSTRACT →
Ultra-diamond growth of semiconductor heterostructures guided by physics-informed machine learning
BY JIANGTAO ZHAO, ZHENGLONG ZHAN, ... 17 JUL 2026 | 9 pages
Physics-informed machine learning guides ultra-diamond semiconductor heterostructures GaP growth via in situ RHEED and feedback control.
ABSTRACT →
Noninvasive measurement of glucose and lactate in thermoregulatory sweat in neonates and adults
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
In both premature babies and adults, blood glucose can be estimated from skin glucose measured with a noninvasive patch.
ABSTRACT →
3D topologically polarized elastic metamaterials enable asymmetric energy isolation at finite frequencies
BY YUANCHENG ZHANG, ZHAO-DONG ZHANG, ... 10 JUL 2026 | 9 pages
Topological elasticity in 3D metamaterials enables robust energy isolation and vibration control at finite frequencies.
ABSTRACT →
Thermodynamic control of Cu-1 nanotopologies enables solar-driven CO_2-to-multicarbon conversion
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
Cu-1 nanotopologies enable low-overpotential C_{2+} formation and 8.84% solar-to-C_{2+} efficiency.
ABSTRACT →
Ridge-assisted micro-positioning of cells in a channel
BY JIANGTAO ZHAO, ... 17 JUL 2026 | 9 pages
Ridge-produced vortices allow cells to be focused in user-defined streamlines over a wide range of flow rates and particle sizes.
ABSTRACT →
Picosecond switching of magnetic tunnel junctions by spin-orbit torque
BY JIANGTAO ZHAO, ... 17 JUL 2026 | 9 pages
Voltage pulses are an efficient tool for picosecond SOT MTJ that advances cellular and energy-efficient nonvolatile memory.
ABSTRACT →
Low-temperature alcoholysis as a strategy for polyethylene terephthalate recycling and upcycling
BY JIANGTAO ZHAO, ... 17 JUL 2026 | 9 pages
Alcoholysis of PET using supported catalysts enables loop-to-loop recycling and upcycling between thermoset and thermoplastic.
ABSTRACT →
Photochemical coproduction of hydrogen and chemicals from a wireless nanoalfalfa leaf
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
A wireless nanoalfalfa leaf drives artificial photosynthesis, converting water and glycerol into hydrogen and chemicals.
ABSTRACT →
Photonic networking of quantum memories in high dimensions
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
High-dimensional entanglement between remote quantum memories enables more efficient and scalable quantum networking.
ABSTRACT →
Reconfigurable ferroelectric transistor array for embodied neuromorphic vision with hardware-native sensing, computing, and activation
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
A reconfigurable 50-FET black-saffire sensing, linear computing, and nonlinear activation in neuromorphic vision hardware.
ABSTRACT →
Dirac magnons in a thin elemental ferromagnet
BY PAUL CARO, JONAS SPERHAKE, PAUL CARO, JONAS SPERHAKE, JONAS SPERHAKE ... 10 JUL 2026 | 9 pages
Dirac magnons of film magnon in thin cobalt film reveal magnetic quasiparticle entanglemagnetic Dirac electron in graphene.
ABSTRACT →
Ultrasoft, adhesive, pH-tunable hydrogel based on in situ functionalized laser-induced graphene for through-hair concurrent biosensing
BY PAUL CARO, JONAS SPERHAKE, PAUL CARO, JONAS SPERHAKE, JONAS SPERHAKE ... 10 JUL 2026 | 9 pages
A pH-tunable adhesive hydrogel enables through-hair concurrent biosensing for anxiety monitoring and nerve rehabilitation.
ABSTRACT →
Reduction of appearance artifacts in wearable on-skin electrodes
BY PAUL CARO, JONAS SPERHAKE, PAUL CARO, JONAS SPERHAKE, JONAS SPERHAKE ... 10 JUL 2026 | 9 pages
Invisible electrodes reduce appearance artifacts for natural facial electrophysiological monitoring in daily life.
ABSTRACT →
Multistage microrobots with pH-responsive release of platelet membrane-coated nanoparticles
BY PAUL CARO, JONAS SPERHAKE, PAUL CARO, JONAS SPERHAKE, JONAS SPERHAKE ... 10 JUL 2026 | 9 pages
A multistage microrobot system uses biomagnetic nanodiscomotors for improved precision intestinal drug delivery.
ABSTRACT →
Programmatic encapsulation of hydrazine within polystiro frameworks for superior self-redox systems
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
Polystiro frameworks are developed with programmatic hydrazine encapsulation for potential propellant applications.
ABSTRACT →
Optical-based stretchable multimodal sensors for detecting strain and light with periodic buckling structures
BY YONGGANG HUANG, ... 17 JUL 2026 | 9 pages
Multimodal detection of light and strain with a stretchable OPD was demonstrated.
ABSTRACT →
Digital metasurface of extensive reprogrammable morphing
BY YONGGANG HUANG, ... 10 JUL 2026 | 9 pages
Digitally addressable Kirigami unit cells enable a reprogrammable digital metasurface for complex 3D surface morphing.
ABSTRACT →
Photoinduced anion exchange for spatially patterned perovskite ASE: Enabling full-color pixelated lasing displays
BY YONGGANG HUANG, ... 10 JUL 2026 | 9 pages
A photoinduced vapor-solid anion-exchange strategy enables full-color pixelated laser displays for photonic applications.
ABSTRACT →
Microenvironment-engineered electrified membrane for reactive separation of ammonia from wastewater
BY YONGGANG HUANG, ... 10 JUL 2026 | 9 pages
A magnet-free electrified membrane enables decentralized recovery of high purity ammonia from water separated urine.
ABSTRACT →
Biomimetic all-metal Pd_{12} helicene
BY YUE HU, JIANGTAO ZHAO, ... 17 JUL 2026 | 9 pages
An all-metal Pd helicene enables structural unfolding and efficient two-electron oxygen reduction performance.
ABSTRACT →
Microfluidic-activated CO_2 regeneration in scalable microporous liquids enabled by contact electrocatalysis
BY YUE HU, JIANGTAO ZHAO, ... 17 JUL 2026 | 9 pages
Microporous liquids boost CO_2 capture and enable low-temperature regeneration via contact electrocatalysis.
ABSTRACT →
Asymmetric radical NHC organocatalysis—enabled highly enantioselective acylation of inert C(sp^3)–C(sp^3) bonds
BY JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
NHCs integrating sulfinic ring hardness and C_2 symmetric direct-site enable highly enantioselective radical C–C cleavage.
ABSTRACT →
A wearable biomechanical system for medical evaluation of soft tissue disorders
BY YUE HU, JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
A compact wireless device monitors the modulus of skin and underlying tissues with diagnostic use for lymphedema and fibrosis.
ABSTRACT →
Mitigating surface structural disorder for high-performance near-infrared quantum dot light-emitting diodes
BY YUE HU, JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
A metal-halomer ligand (MHL) passivation strategy boosts performance of perovskite NIR QLEDs.
ABSTRACT →
Moisture sorption and hydration dynamics in intrinsically hygroscopic hydrogels
BY YUE HU, JIANGTAO ZHAO, ... 10 JUL 2026 | 9 pages
Intrinsically hygroscopic gels capture water from dry air and reveal hydration dynamics within soft gels.
ABSTRACT →

BIOMEDICINE AND LIFE SCIENCES

Extensive parasite transmission and variation in a functional receptor associated with drug resistance in endemic *Schistosoma mansoni*
BY ALEX HOBAN, ... 17 JUL 2026 | 9 pages
Population genomics and functional genetics reveal variance associated with praziquantel response in Schistosoma mansoni.
ABSTRACT →
Mesenchymal stem cells receive adaptive islet-derived miR-151-containing sEVs to promote β-cell compensation in obesity
BY ZHENG LIU, YUAN YANG, ZHENGLIU, ... 10 JUL 2026 | 9 pages
Mesenchymal stem cell uptake of islet-derived miR-151-enriched sEVs improves β-cell compensation in obesity.
ABSTRACT →
The RNAPK5-RbL2/E4F1-RVAWK19 module orchestrates ethylene-induced petal abscission via dual control of ROS homeostasis in rose
BY ZHENG LIU, ... 10 JUL 2026 | 9 pages
The RbL2/E4F1-RbL2/E4F1-RVAWK19 module gates ethylene-induced petal abscission in rose by orchestrating ROS homeostasis.
ABSTRACT →
Shaping of developmental gradients through selection on multiple loci in Arabidopsis
BY ZHENG LIU, ... 10 JUL 2026 | 9 pages
Evolutionary dampening of flower color patterns with molecular pinpoints.
ABSTRACT →
Satellite DNA sequence dictates pericentromere heterochromatin formation and function
BY ZHENG LIU, ... 10 JUL 2026 | 9 pages
Equally evolving satellite DNA impacts heterochromatin formation and recombination of a key regulator of chromosome segregation.
ABSTRACT →

RELATED RESEARCH
Repeat offenders: Satellite DNA sequence variation drives heterochromatin instability
BY STEFFIE A. ELLIS, ... SCIENCE ADVANCES | 10 JUL 2026

Simultaneous measurements of translation rate and transcriptome uncovers linked regulation within an active bacterial cell population
BY ZHENG LIU, ... 10 JUL 2026 | 9 pages
Single-cell analysis identifies links between bacterial gene expression and translation in diverse cellular populations.
ABSTRACT →
Iron overload suppresses LKB1 and induces IL36G anti-tumor immunity in PDAC metastasis
BY ZHENG LIU, ... 10 JUL 2026 | 9 pages
Iron inhibitor stabilizes an IRS-2/ubiquitin-LKB1 complex to inhibit downstream signaling cascades driving anti-tumor immunity.
ABSTRACT →
Efficient chemical reprogramming of human T cells into functional megakaryocytes and platelets
BY ... 10 JUL 2026 | 9 pages
Direct chemical reprogramming of human T cells into functional platelets offers a practical source for transfusion medicine.
ABSTRACT →
Disease landscape–guided design of neutrophil-specific reporters for early and accurate pneumonia detection in vivo and in ex vivo
BY ... 17 JUL 2026 | 9 pages
activatable fluorescent probes can be used for early and bacterial detection of pneumonia.
ABSTRACT →
Dual role of the receptor kinase FERONIA in regulating tissue mechanics and growth
BY ... 10 JUL 2026 | 9 pages
The receptor kinase FERONIA mediates a double feedback from tissue mechanics on growth rate.
ABSTRACT →
Transcription initiation drives dosage compensation establishment and maintenance in male *Drosophila*
BY ... 10 JUL 2026 | 9 pages
Enhanced Pol II initiation is a general principle in early establishment and maintenance of dosage compensation in Drosophila.
ABSTRACT →
Single-cell and spatial omics reveals region-specific plasticity and therapeutic vulnerabilities in metastatic high-risk neuroblastoma
BY ... 10 JUL 2026 | 9 pages
Multi-omics reveals region-specific plasticity, immune evasion, and targetable vulnerabilities in metastatic neuroblastoma.
ABSTRACT →
A distinct antigen presentation pathway drives potent T cell immunity in lipid nanoparticle–based mRNA vaccines
BY ... 10 JUL 2026 | 9 pages
mRNA LNP vaccines elicit potent CD8 T cell responses through antigen presentation pathways distinct from conventional DC1DCs.
ABSTRACT →
Wnt/ceramide metabolically programs proflorotic macrophages in 3D cultures and idiopathic pulmonary fibrosis
BY ... 10 JUL 2026 | 9 pages
Wnt/ceramide in 3D drives a profibrotic, metabolic macrophage phenotype, relaxing idiopathic pulmonary fibrosis.
ABSTRACT →
Hypermetabolic of the nuclear lamina is associated with attenuated mechanosensitivity in giant nucleated cancer cells
BY ... 10 JUL 2026 | 9 pages
Nuclear lamina hypermetabolic in giant cancer cells arises from excess lamina area and excretion with impaired mechanosensitivity.
ABSTRACT →
IFLnB: A novel stress-operated calcium entry modulator contributing to muscle dysfunction during denervation
BY ... 10 JUL 2026 | 9 pages
Targeting IFLnB rescues stressors muscle calcium homeostasis and helps preserve muscle function after loss of innervation.
ABSTRACT →
ALR couples IMS redox and heme biosynthesis beyond the disulfide relay
BY ... 10 JUL 2026 | 9 pages
CHCH is a direct substrate of the mitochondrial sulfidase ALR, linking intermembrane space redox chemistry to heme biosynthesis.
ABSTRACT →
Heterochronic limb patterning in marsupials reveals flexibility in the processes underlying lateral plate mesoderm development
BY ... 10 JUL 2026 | 9 pages
Accelerated limb formation in marsupials reveals canonical developmental landmarks aren't strict prerequisites for initiation.
ABSTRACT →
PUM1 and PUM2 promote translation of chromatin regulators to ensure mammalian spermatogenesis
BY ... 10 JUL 2026 | 9 pages
PUM1/2 cooperate with Eif4G and PABPC1 to selectively enhance translation of chromatin regulators required for spermatogenesis.
ABSTRACT →
Spliceosome buffers cryptic genetic variation to enforce phenotypic robustness in Arabidopsis
BY ... 10 JUL 2026 | 9 pages
Alternative splicing acts as a canalization mechanism to buffer cryptic genetic variation and reduce phenotypic robustness.
ABSTRACT →
High-resolution cryo-EM structure of integrin αIIbβ3 bound to disease-causing maternal HPA-1a antibody that blocks integrin activation
BY ... 10 JUL 2026 | 9 pages
Cryo-EM of maternal HPA-1a antibody/integrin αIIbβ3 complex reveals structural basis for inhibition of integrin activation.
ABSTRACT →
Spaceflight multi-omics reveals vulnerabilities of human germ cell development
BY ... 10 JUL 2026 | 9 pages
Spaceflight impairs human germ cell development in vitro, revealing reproductive vulnerabilities for deep-space exploration.
ABSTRACT →
Central nervous system B cell multimicrobiota reveals a legacy of immune dysregulation in long-term treated HIV infection
BY ... 10 JUL 2026 | 9 pages
HIV-therapy-treated nervous system B cells despite treatment, revealing hidden immune link in lasting neurological problems.
ABSTRACT →
Albumin binding improves the pharmacokinetics and therapeutic efficacy of α-^{211}At-labelled HER2 Fab radioconjugates
BY ... 10 JUL 2026 | 9 pages
An albumin-binding HER2 Fab radioconjugate improves pharmacokinetics to enhance targeted α radiotherapy therapy.
ABSTRACT →
Fibroblast-specific ablation of MHC-I antigen presentation via the IGF2 axis origins CD8$^+$ T cell surveillance in lung cancer
BY ... 10 JUL 2026 | 9 pages
The AT1-IGF2 axis governs fibroblast MHC-I antigen presentation and CD8$^+$ T cell surveillance in lung cancer.
ABSTRACT →
NicheFest: Cell-type-resolved proteomics of tissue compartments
BY ... 10 JUL 2026 | 9 pages
Deliberate simulation of Weighted microscope-based platform for cell-type- and tissue-region-resolved proteomics.
ABSTRACT →
Single-cell transcriptomic unveils tumor-mediated reprogramming of neutrophils and their unique vulnerability that inhibits metastasis
BY ... 10 JUL 2026 | 9 pages
FGF21 induced by endoplasmic reticulum stress maintains nonfatty thymic epithelial cell function and central immune tolerance
BY ... 10 JUL 2026 | 9 pages
FGF21, induced by endoplasmic reticulum stress in EPC, preserves protein homeostasis and supports central immune tolerance.
ABSTRACT →
A fungal sulfatase-like protease SIF1 blocks rice immunity by erasing the HAPKRRXz signaling node
BY ... 10 JUL 2026 | 9 pages
A fungal protease SIF1 disarms rice immunity by destroying a key defense protein OsMAPKRRXz, jeopardizing vulnerable to disease.
ABSTRACT →
TPR-associated folding of class I HSP40 family proteins regulated by distinct co-chaperone and sulfator networks
BY ... 10 JUL 2026 | 9 pages
TRC-linked free gene regulation—class I HSP40s—through distinct helper networks, revealing how stable enzymes nutrient differently.
ABSTRACT →
Structural basis of kinesin-1 autoinhibition and its control of microtubule-based motility
BY ... 10 JUL 2026 | 9 pages
Cryo-EM reveals the structural basis of kinesin-1 autoinhibition and its activation by MAP7D1.
ABSTRACT →
Photonic waveguide chip–based nanoscopy visualizes rearrangements of the cortical actin cytoskeleton in activated Jurkat T cells
BY ... 10 JUL 2026 | 9 pages
Photonic waveguide chip–based nanoscopy visualizes cortical actin rearrangements in activated Jurkat T cells.
ABSTRACT →
Supramolecular optical Fluorescence imaging reveals that immune cells adapt their scaffold structures on the nanoscale.
ABSTRACT →
Mechanisms of VEGFR2 activation by VEGF, neuropilin, and heparin
BY ... 10 JUL 2026 | 9 pages
Cryo-EM structures reveal how the neuropilin and heparin stabilize VEGFR dimer and high-order oligomers for enhanced signaling.
ABSTRACT →
Structure and dynamics of a four-protofilament microtubule from Heterodoliochaetes α/β-tubulin
BY ... 10 JUL 2026 | 9 pages
A minimal four-protofilament microtubule reproduces key features of eukaryotic dynamics.
ABSTRACT →
