694

EDITORIAL

683 Institutionalizing politicized science

—D. Moynihan and P. Herd

NEWS

684 With Trump's cuts escalating, 'fear factor' silences researchers

Many worry about retribution. But for others, speaking out is worth the risk —W. Cornwall

686 Trump takes steps toward a radically different NSF

Democrats question latest changes in how the research agency makes grants —J. Mervis

688 Project to revive Louisiana coastline runs aground

Politics and lawsuits imperil plans to divert the Mississippi River to build new land —W. Cornwall

689 AI-designed antibody candidates hit a crucial target

Companies find enticing drug leads that bind to tricky cell membrane proteins —R. F. Service

690 Mosquito-borne viral disease sweeps Indian Ocean islands

Safety issues with the only available vaccine are complicating the response to chikungunya —M. Wadman

692 Executive order on risky research brings confusion

Directive aims to restrict gain-of-function studies on microbes and more, but no one knows what's affected —K. Kupferschmidt

FEATURES

694 Mind reader?

A forensic technology developed in India sifts brain recordings for clues to a suspect's guilt or innocence. Many neuroscientists are skeptical, but it is catching on in other countries —J. Moens

PODCAST

COMMENTARY

PERSPECTIVES

700 Expanded utility belt for tackling bat viruses

A diverse organoid panel illuminates bat-virus interactions and the potential of trans-species spillover —J. Zhou and K. Y. Yuen
RESEARCH ARTICLE p. 756

702 Watching electronic ice melt

An experiment captures images of the transition between liquid and solid states of an electron system —S. Joy and B. Skinner
RESEARCH ARTICLE p. 736

703 A nuclear house divided

Certain fungal plant pathogens maintain varying chromosome distributions across multiple nuclei —T. J. Mitchison and W. T. Sullivan
RESEARCH ARTICLE p. 784

705 Astrocytes, hidden puppet masters of the brain

Astrocyte signaling pathways influence neuronal networks and behavioral responses to neuromodulators —C. Eroglu
RESEARCH ARTICLES pp. 763, 769, & 776

POLICY FORUM

707 Deliberate extinction by genome modification: An ethical challenge

What circumstances might justify deliberate, full extinction of a species? —G. E. Kaebnick *et al.*

BOOKS ET AL.

710 Very good dogs

The beagle has sacrificed much for biomedical research—was it worth it? —B. J. King

756 Organoids

Diverse bat organoids provide pathophysiological models for zoonotic viruses
—H. Kim *et al.*

PERSPECTIVE p. 700

Neurophysiology

763 GPCR signaling gates astrocyte responsiveness to neurotransmitters and control of neuronal activity
—K. A. Gattenplan *et al.*

769 Norepinephrine changes behavioral state through astroglial purinergic signaling
—A. B. Chen *et al.*

776 Norepinephrine signals through astrocytes to modulate synapses
—K. B. Lefton *et al.*

PERSPECTIVE p. 705

784 Genetics

Distribution of haploid chromosomes into separate nuclei in two pathogenic fungi
—Y. Xu *et al.*

PERSPECTIVE p. 703

WORKING LIFE**790 The cost of health**

—L. de Macedo Monteiro

682 Science Staff

789 Science Careers

**700
& 756****711 Energy's international history and future**

Scholars find lessons for today in foundational energy texts with an emphasis on the Global South
—R. Sorkhabi

LETTERS**712 Leaving synthetic pesticides behind**

—N.-F. Wan *et al.*

713 Revolutionize textile recycling

—L. Dai *et al.*

714 El Salvador revives metallic mining risks

—D. J. Arévalo-Ayala *et al.*

RESEARCH**HIGHLIGHTS**

715 From *Science* and other journals

RESEARCH SUMMARIES
Population genetics

718 Admixture's impact on Brazilian population evolution and health —K. Nunes *et al.*

719 From North Asia to South America: Tracing the longest human migration through genomic sequencing —E. S. Gusareva *et al.*

720 Virology

Cryptic infection of a giant virus in a unicellular green alga
—M. P. Erazo-Garcia *et al.*

721 Virology

Molecular basis of influenza ribonucleoprotein complex assembly and processive RNA synthesis —R. Peng *et al.*

722 CRISPR

Programmable gene insertion in human cells with a laboratory-evolved CRISPR-associated transposase
—I. P. Witte *et al.*

723 Signal transduction

Activation dynamics traced through a G protein-coupled receptor by 81^1H - ^{15}N NMR probes
—F.-J. Wu *et al.*

RESEARCH ARTICLES**724 Batteries**

Halide segregation to boost all-solid-state lithium-chalcogen batteries
—J. Lee *et al.*

730 Mesoscopic physics

Anyon braiding and telegraph noise in a graphene interferometer
—T. Werkmeister *et al.*

736 2D materials

Imaging quantum melting in a disordered 2D Wigner solid
—Z. Xiang *et al.*

PERSPECTIVE p. 702

741 Range shifts

Limited evidence for range shift-driven extinction in mountain biota
—Y.-H. Chen *et al.*

748 Paleontology

Sustainability insights from Late Pleistocene climate change and horse migration patterns
—Y. Running Horse Collin *et al.*

PODCAST

ON THE COVER

Two semiwild Camargue horses gallop through the wetlands and marshes of southern France. Research traces horse movements across Eurasia and the Americas during the Late Pleistocene. By moving together with interrelated life forms, horses bring balance and sustainability to their ecosystems. See page 748. Photo: Art Wolfe

Science serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2025 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$2865; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.science.org; bulk rate on request. Authorization to reproduce material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act can be obtained through the Copyright Clearance Center (CCC), www.copyright.com. The identification code for *Science* is 0036-8075. *Science* is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.
