1016

After drought dried up reservoirs in Texas, officials in Austin turned to climate modelers to help plan infrastructure.

EDITORIAL

1005 America is ceding the lead in creating the future

—H. H. Thorp

NEWS

1008 National Academies on brink of dramatic downsizing

Venerable advisory organization hit by Trump's contract cancellations —M. Wadman

1009 Final NSF budget proposal details massive cuts

Trump request favors one giant telescope and kills a gravitational wave detector —J. Mervis

1010 Budget proposal would kill dozens of active and planned NASA spacecraft

Proposal comes as White House pulls its nominee to lead NASA —P. Voosen

1012 NIH funding policy deals new blow to HIV trial networks

Halt to foreign "subawards" disrupts studies and compromises ethical obligations to trial volunteers —S. Reardon

1014 Physicists' best hint of something new vanishes

Long-running experiment concludes muon is no more magnetic than theory predicts —A. Cho

1015 Pre-Columbian Great Lakes farmers transformed the land

Innovative techniques yielded corn, beans, and squash for 600 years before European contact —A. Lawler

RESEARCH ARTICLE p. 1082

FEATURES

1016 Hazy futures

Projecting the local impacts of global warming is a stubborn challenge. But cities need answers fast —P. Voosen

PODCAST

COMMENTARY

PERSPECTIVES

1022 How migrating marine megafauna tracks with conservation

Area-based conservation is not sufficient to protect the ocean's most highly mobile species —L. R. Gerber and K. Davis

RESEARCH ARTICLE p. 1086

1024 Keeping in contact with lithium

Sodium in the lithium anode promotes fast discharge in a solid-state battery —D. Spencer-Jolly

RESEARCH ARTICLE p. 1062

1025 Nanowires replace lost retinal cells

Tellurium nanowire networks could open up new avenues for artificial vision —E. Fernández

RESEARCH SUMMARY p. 1041

1026 The complex role of brain cilia in feeding control

Variants in a ciliary receptor are associated with obesity

—A. Asthana and P. K. Jackson

RESEARCH SUMMARY p. 1042

POLICY FORUM

1028 A global minerals trust could prevent inefficient and inequitable protectionist policies

Critical mineral supply and demand require global coordination to reduce market volatility and conflict risk —S. H. Ali *et al.*

BOOKS ET AL.

1031 In defense of silly science

A biologist pushes back against attacks on curiosity-driven research —C. Kemp

1032 Values remain a mystery to many economists

The field ignores moral plurality at its peril —G. F. DeMartino

LETTERS

1033 Independent oversight crucial to Landsat Next

—D. P. Roy *et al.*

1034 Ecological risks of biodegradable plastics

—X. Zhao *et al.*

1034 Africa's epidemic of low-quality medicines

—H. Hamill *et al.*

RESEARCH

HIGHLIGHTS

1035 From *Science* and other journals

RESEARCH SUMMARIES

1038 Human development

Gastruloids enable modeling of the earliest stages of human cardiac and hepatic vascularization —O. J. Abilez *et al.*

1039 Physiology

Is taurine an aging biomarker? —M. E. Fernandez *et al.*

1040 Structural biology

Structural insights into chromatin remodeling by ISWI during active ATP hydrolysis —Y. Sia *et al.*

1041 Neurotechnology

Tellurium nanowire retinal nanoprostheses improves vision in models of blindness —S. Wang *et al.*

PERSPECTIVE p. 1025

1042 Cell biology

GPR45 modulates $G\alpha_s$ at primary cilia of the paraventricular hypothalamus to control food intake —Y. Xun *et al.*

PERSPECTIVE p. 1026

1043 Neuroscience

In vivo multiplex imaging of dynamic neurochemical networks with designed far-red dopamine sensors —Y. Zheng *et al.*

RESEARCH ARTICLES

1044 Passive cooling

Passive cooling paint enabled by rational design of thermal-optical and mass transfer properties —J. Fei *et al.*

1050 Solid state physics

Direct measurement of the quantum metric tensor in solids —S. Kim *et al.*

1055 Synthetic chemistry

In-insect synthesis of oxygen-doped molecular nanocarbons —A. Usami *et al.*

1062 Batteries

Interface morphogenesis with a deformable secondary phase in solid-state lithium batteries —S. G. Yoon *et al.*

PERSPECTIVE p. 1024

1069 Marine microbes

Oxygen intrusions sustain aerobic nitrite-oxidizing bacteria in anoxic marine zones —P. J. Buchanan *et al.*

1075 Conservation

Dehorning reduces rhino poaching —T. Kuiper *et al.*

1082 Archaeology

Archaeological evidence of intensive indigenous farming in Michigan's Upper Peninsula, USA —M. McLeester *et al.*

ON THE COVER

The last male northern white rhino socializes with a southern white rhino. Since his death in 2018, the northern subspecies is functionally extinct after decades of illegal killing for their horns. A study from the Greater Kruger region of South Africa offers some hope for remaining rhino species, proving that dehorning operations can achieve poaching reductions under certain circumstances and in conjunction with other interventions. See page 1075. Photo: Ami Vitale

ON THE PODCAST

Farming maize in ice age Michigan, predicting the future climate of cities, and our host takes a quiz on the sounds of science
