# 1170

## EDITORIAL

**1165 Gold standard science requires gold standard scholarship** —H. Holden Thorp

## NEWS

**1166 Hanford set to finally lock up nuclear waste in glass**  
But some officials fear Trump administration may be aiming for an alternative solution —W. Cornwall

**1168 Far more authors use AI than admit it**  
Study by cancer publisher highlights promise of AI detectors and the challenges they pose —J. Brainard

**1170 After bizarre journey, precious archive of molecular biology history finds new home**  
Science History Institute makes public multimillion-dollar collection, including Rosalind Franklin's famous DNA image, assembled by fake scientist —J. Cohen

**1172 Amid war, a genomics research program blooms in Ukraine**  
Inaugural project for new center searches for genes involved in diabetes —R. Stone

**1173 Funding delays frustrate agricultural researchers**  
Grants awarded by the U.S. Department of Agriculture have dropped sharply —E. Stokstad

## FEATURES

**1175 A shot at survival**  
Fifty years ago, Carol Baker proposed vaccinating pregnant women to save babies from a deadly microbe. Now, the idea is nearing fruition —L. Roberts  
PODCAST

## COMMENTARY

### BOOKS ET AL.

**1180 Fall books 2025**  
PODCAST

## PERSPECTIVES

**1187 Solid-state hydrogen storage goes electric**  
Electrochemistry enables reversible storage and release of hydrogen gas in a metal hydride —R. O'Hayre and S. M. Haile  
RESEARCH ARTICLE p. 1252

**1188 Genomic clues into the spread of deadly mosquitoes**  
Ancient and more recent human interactions shape mosquito vector evolution —T. E. Carter  
RESEARCH SUMMARIES pp. 1208 & 1209

**1190 Deep down in the fault zone**  
Distant seismic waves provide clues to the evolution of crustal structure after a large earthquake —A. M. Rodriguez Padilla  
RESEARCH ARTICLE p. 1256

## 1191 Trade-offs and human adaptation at the extremes

Genomic analyses of Turkana pastoralists identify variants that increase water retention  
—K. McVay and A. Goldberg

RESEARCH ARTICLE p. 1246

## LETTERS

### 1193 Global implications of cholera in Sudan

—A. A. H. Abdellatif and E. M. Abdallah

### 1193 Protect academia in Sudan with global action

—H. Y. Hassan

### 1194 Wastewater surveillance requires ethical use

—P. M. D'Aoust

## ANALYSIS

### POLICY ARTICLE

### 1195 Partisan disparities in the funding of science in the United States

Republican lawmakers consistently provided robust federal funding, often exceeding Democrats  
—A. C. Furnas *et al.*

## REVIEWS

### REVIEW SUMMARY

#### 1201 Batteries

The contrast between monovalent and multivalent metal battery anodes —Y. Li *et al.*

## RESEARCH

### HIGHLIGHTS

**1202** From *Science* and other journals

## RESEARCH SUMMARIES

### 1205 Molecular biology

Functional maps of a genomic locus reveal confinement of an enhancer by its target gene —M. Eder *et al.*

### 1206 Molecular biology

Kinetic organization of the genome revealed by ultraresolution multiscale live imaging —J. Lee *et al.*

### 1207 Population dynamics

Genomic demography predicts community dynamics in a temperate montane forest —J. P. O'Dwyer *et al.*

### Mosquito genetics

**1208** 1206 genomes reveal origin and movement of *Aedes aegypti* driving increased dengue risk  
—J. E. Crawford *et al.*

**1209** Genomic diversity of the African malaria vector *Anopheles funestus* —M. Boddé *et al.*

PERSPECTIVE p. 1188

## RESEARCH ARTICLES

### 1210 Animal communication

Categorical and semantic perception of the meaning of call types in zebra finches —J. E. Elie *et al.*

### 1216 Marine ecology

Cumulative impacts to global marine ecosystems projected to more than double by mid-century  
—B. S. Halpern *et al.*

### 1220 Monsoons

More extreme Indian monsoon rainfall in El Niño summers  
—S. A. Hill *et al.*

### 1225 Quantum mechanics

Quantum squeezing of a levitated nanomechanical oscillator  
—M. Kamba *et al.*

### 1229 Rangelands

Climate rather than overgrazing explains most rangeland primary productivity change in Mongolia  
—A.-O. Purejav *et al.*

### 1234 Quantum processing

Scalable entanglement of nuclear spins mediated by electron exchange  
—H. G. Stemp *et al.*

### 1239 Organic chemistry

Stereo-reversed E2 unlocks Z-selective C–H functionalization  
—P. J. Verardi *et al.*

### 1246 Human genetics

Adaptations to water stress and pastoralism in the Turkana of northwest Kenya  
—A. J. Lea *et al.*

PERSPECTIVE p. 1191

### 1252 Electrochemistry

High-capacity, reversible hydrogen storage using H<sup>+</sup>-conducting solid electrolytes  
—T. Hirose *et al.*

PERSPECTIVE p. 1187

### 1256 Seismology

Crustal stresses and damage evolve throughout the seismic cycle of the Ridgecrest fault zone  
—J. Bryan *et al.*

PERSPECTIVE p. 1190

## WORKING LIFE

### 1266 A gateway without guidance

—Anonymous

### 1261 Science Careers

## ON THE COVER

Young Turkana herders guide camels across Kenya's arid landscape near Lake Turkana at sunset. Pastoralism remains central to survival in this region, where heat and water scarcity pose constant challenges. New research uncovers the genetic signatures that underlie adaptation to arid living in this pastoralist community. See pages 1191 and 1246. Photo: Kirsten Frost/FROST Photo Tours

## ON THE PODCAST

Protecting newborns from an invisible killer, the rise of drones for farming, and a Druid mystery
