NANO LETTERS

September 14, 2022
Volume 22, Issue 17
Pages 7169-7377

About the Cover

Evolving scattering microscopic images of a hydrogel-functionalized silicon (001) surface, showing how etching anisotropy improves from a disordered pattern to a well-defined pyramidal texture. The cover art was inspired by the Research Letter by Ma et al. on page 7289 of this issue.
