## 11

With thin solar sails, the Sundiver mission could reach blistering speeds—showing how telescopes might be sent far beyond Pluto in just 25 years.

### EDITORIAL

**5 Resisting AI slop**  
—H. H. Thorp

### NEWS

**8 AI threatens to upend online social science research**  
Researchers stuck in arms race as increasingly sophisticated models evade detection tools —C. O'Grady

**10 Bell Labs 2.0? Silicon Valley bets on science**  
Billionaire-backed Episteme aims to free research from bureaucracy. History shows that's a tall task —A. Rogers

**11 Sun-size lens could reveal alien continents and oceans**  
Telescopes far beyond Pluto could use the Sun's gravity to magnify a distant planet —D. Clery  
PODCAST

**12 Study of South Asian genomes illuminates roots of milk drinking**  
Natural selection was at work—but only in populations with no alternative to dairy —M. Price

**14 Hack reveals reviewer identities for huge AI conference**  
Software bug leads to exposure of peer-review records for 10,000 papers —C. Zhao and M. Greshko

**15 Trump moves to break up leading U.S. climate center**  
White House budget director says Colorado institution is a source of "climate alarmism" —H. Richter

### FEATURES

**16 Man in the middle**  
NIH Director Jay Bhattacharya has struggled to convince observers he has the agency's best interests in mind—and is truly in charge —J. Kaiser

### COMMENTARY

#### PERSPECTIVES

**20 Divergent destinies of polymorphism**  
Lizards maintain or lose color variation through interactions between genetics, selection, and plasticity —S. S. Gopalan and T. A. Castoe  
RESEARCH ARTICLES pp. 64 & 69

**21 Genetic resistance to leukemia**  
A genome-wide association study identifies a genetic variant that reduces the risk of leukemia —F. Caiado and M. G. Manz  
RESEARCH ARTICLE p. 52

**23 Two views of a rogue planet**  
A collaboration between ground and space observations unveils a rogue planet —G. A. L. Coleman  
RESEARCH ARTICLE p. 96

**24 Lighting the spark of aptamer data science**  
The application of data science to aptamer discovery reveals latent features of enriched libraries —G. Mayer  
RESEARCH SUMMARY p. 51

### POLICY FORUM

**26 Translating climate science into legal standards: Lessons from the *Milieudefensie v. Shell* case**  
Courts struggle with applying results of integrated assessment models to individual companies —S. Dietz *et al.*

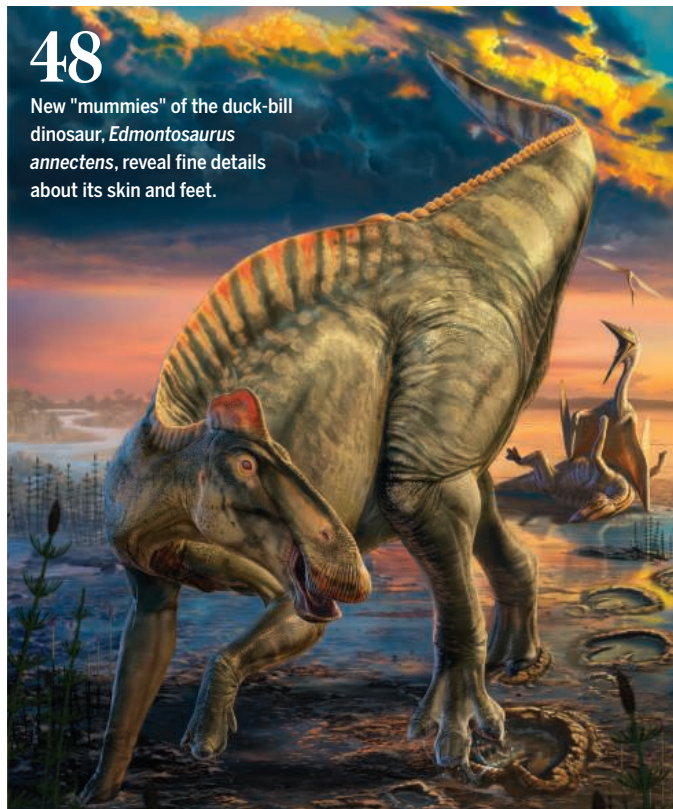

### BOOKS ET AL.

**30 The future of marine fisheries**  
A journalist warns of widespread harm, but better science and management practices point to a robust prognosis —F. Werner

## 48

New "mummies" of the duck-bill dinosaur, *Edmontosaurus annectens*, reveal fine details about its skin and feet.

### 31 Rethinking intersex interventions

Surgeries do more harm than good for those who do not meet binary sex expectations, argues a scholar —A. L. Swarr

### LETTERS

### 32 Australia's harmful fossil fuel approvals —H. Thomas *et al.*

### 32 Australian rare earth plans imperil biodiversity

—Y. Yan and J. R. Rhodes

### 33 Next steps for WTO fisheries agreement

—S. Villasante *et al.*

## REVIEWS

### 34 Cell biology

Quantifying host-microbe interactions with bacterial lineage tracing —I. W. Campbell *et al.*

## RESEARCH

### HIGHLIGHTS

**42** From *Science* and other journals

### RESEARCH SUMMARIES

#### 45 Solar cells

Limiting phosphonic acid interlayer–perovskite reactivity to stabilize perovskite solar modules —C. Fei *et al.*

#### 46 Behavior

Neural basis of cooperative behavior in biological and artificial intelligence systems —M. Jiang *et al.*

#### 47 Protein design

De novo design of small molecule–regulated protein oligomers —Q. Jin *et al.*

#### 48 Paleontology

Duck-billed dinosaur fleshy midline and hooves reveal terrestrial clay-template "mummification" —P. C. Sereno *et al.*

#### 49 Migration

Genomic and morphometric evidence for Austronesian-mediated pig translocation in the Pacific —D. W. G. Stanton *et al.*

#### 50 Structural biology

Asynchronous subunit transitions prime acetylcholine receptor activation —M. J. Thompson *et al.*

#### 51 Aptamers

SPARK-seq: A high-throughput platform for aptamer discovery and kinetic profiling —G. Luo *et al.*  
PERSPECTIVE p. 24

### RESEARCH ARTICLES

#### 52 Hematology

Inherited resilience to clonal hematopoiesis by modifying stem cell RNA regulation —G. Agarwal *et al.*  
PERSPECTIVE p. 21

#### 59 Plant science

ARF3-mediated auxin signaling is essential for sex determination in cucumber —L. Han *et al.*

#### Polymorphism

**64** Adaptive spread of a sexually selected syndrome eliminates an ancient color polymorphism in wall lizards —T. Uller *et al.*

**69** The genetics, evolution, and maintenance of a biological rock-paper-scissors game —A. Corl *et al.*

PERSPECTIVE p. 20

#### 75 Spectroscopy

Local fields reveal atomic-scale nonadiabatic carrier-phonon dynamics —S. Neb *et al.*

#### 79 2D materials

Experimental evidence for nodal superconducting gap in moiré graphene —J. M. Park *et al.*

#### 84 Organic chemistry

Ferrioxalate photocatalysis: A multitasking platform for reductive iron catalysis —C. Bernabeu *et al.*

#### 90 Plant genetics

Postdomestication selection of MKK3 shaped seed dormancy and end-use traits in barley —M. E. Jørgensen *et al.*

#### 96 Exoplanets

A free-floating-planet microlensing event caused by a Saturn-mass object —S. Dong *et al.*

PERSPECTIVE p. 23

## WORKING LIFE

### 102 Building confidence

—Z. Liu

### 101 Science Careers

### ON THE COVER

Dormancy is the suppression of seed sprouting under environmental conditions that normally favor germination. In domesticated barley, grains with low levels of dormancy can sprout before harvest in the field after exposure to dew, mist, or rain. Preharvest sprouting in barley and other cereals reduces the quality of mature grain and jeopardizes its end-use value. See page 90. Credit: Viktor Gjerlöv Hertz, Carlsberg Research Laboratory

*Science* serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.sciencemag.org; bulk rate on request.
