15 JANUARY 2026 | VOLUME 391 | ISSUE 6782

228

Conservation teams on Floreana Island have been preparing to reintroduce locally extinct species.

EDITORIAL

219 The High Seas Treaty, at last

—K. Grorud-Colvert and J. Sullivan-Stack

NEWS

220 Scientists reject call to retest childhood vaccines

“Gold standard” trials advocated by the Trump administration are unethical and unnecessary, critics say —J. Cohen

222 Cellular ‘vaults’ deployed to spy on gene activity

Enigmatic protein shells can be engineered to capture messenger RNA made by cells over the course of a week —J. Travis

RESEARCH ARTICLE BY Y.-K. CHAO ET AL., 10.1126/SCIENCE.ADZ9353

224 Low doses of insecticide speed fish aging and death

Harms of chlorpyrifos emerge in polluted lakes and laboratory aquarium tanks —E. Stokstad
RESEARCH ARTICLE p. 275

225 Arctic’s ‘last ice area’ is on thin ice

Mission to Canada’s Queen Elizabeth Islands reveals signs of weakness in a sea ice haven —R. Berkowitz

226 Ex–Google CEO funds private space telescope bigger than Hubble

Schmidt Sciences invests in orbiting observatory and three ground-based instruments —D. Clery

FEATURES

228 A difficult rebirth

Scientists are ramping up an ambitious project to reverse centuries of ecological destruction on a Galápagos island —S. Quaglia
PODCAST

COMMENTARY

PERSPECTIVES

234 Not a big baby

Multipronged approaches resolve the debate about the *Nanotyrannus* fossil species —A. A. Farke
RESEARCH ARTICLE p. 300

235 Uncovering Antarctica’s icedraped landscape

The mesoscale topographical variability beneath a continent-scale ice sheet is revealed —D. A. Young
RESEARCH ARTICLE p. 314

237 Blood vessels under pressure

A protein in perivascular fat cells protects mice against hypertension —M. O. J. Grootaert and A. Luttmann
RESEARCH ARTICLE p. 306

238 Robust perovskite nanocrystal emitters

Hierarchical shells stabilize soft and labile metal halide perovskite surfaces for screen displays —K. Wei and M. Yuan
RESEARCH SUMMARY p. 266

240 A new cell type drove human brain complexity

How did the human brain acquire a vast repertoire of interneurons? —A. Bonafina and L. Nguyen
RESEARCH SUMMARY p. 265

POLICY FORUM

241 A theory of change approach to enhance the post-2030 sustainable development agenda

A better approach is needed to assess potential impact and feasibility of proposals —C. Allen et al.

BOOKS ET AL.

245 The branching legacies of America's past

Plants serve as witnesses to the country's history in a primer that celebrates Black botanical knowledge —M. Pinto

246 Careful science is valuable, regardless of results

Scientists should be celebrated for more than just flashy findings, argues a philosopher —B. Hyde

LETTERS

247 Misusing research to trap songbirds in Spain

—J. J. Negro *et al.*

247 Canada's dismantled safeguards threaten salmon

—M. H. H. Price and A. Berchtold

248 Climate-change extremes threaten Iraq

—B. Mohammed Hashim and Z. M. Yaseen

REVIEWS

249 Artificial intelligence

Transforming mental health research and care through artificial intelligence

—N. Opel and M. Breakspear

RESEARCH

HIGHLIGHTS

259 From *Science* and other journals

RESEARCH SUMMARIES

262 Immunology

Macrophage MRI antigen presentation promotes MAIT cell immunity and lung microbiota modulation —J. Deng *et al.*

263 Immunology

Nucleotide metabolic rewiring enables NLRP3 inflammasome hyperactivation in obesity —D. Liu *et al.*

264 Cardiology

Deep-learning analysis of 3D microarchitectural remodeling in hypertrophic cardiomyopathy —E. Q. Wei *et al.*

265 Development

Subventricular zone radial glial cells maintain inhibitory neuron production in the human brain —L. Jia *et al.*

PERSPECTIVE p. 240

266 Perovskite emitters

A hierarchical shell locks and stabilizes perovskite nanocrystals with near-unity quantum yield —Q. Zeng *et al.*

PERSPECTIVE p. 238

RESEARCH ARTICLES

267 Organic chemistry

The photohydrolysis of furans —N. Frank *et al.*

275 Pesticide risks

Chronic low-dose exposure to chlorpyrifos reduces life span in a wild fish by accelerating aging —K. Huang *et al.*

NEWS STORY p. 224

280 Radio astronomy

A sudden change and recovery in the magnetic environment around a repeating fast radio burst —Y. Li *et al.*

285 Paleontology

Paleogeography modulates marine extinction risk throughout the Phanerozoic —C. M. Malanoski *et al.*

290 Quantum simulation

Characterizing transport in a quantum gas by measuring Drude weights —P. Schüttelkopf *et al.*

294 Plate tectonics

Low-frequency earthquakes track the motion of a captured slab fragment —D. R. Shelly *et al.*

300 Vertebrate paleontology

A diminutive tyrannosaur lived alongside *Tyrannosaurus rex* —C. T. Griffin *et al.*

PERSPECTIVE p. 234

306 Metabolism

Ablation of *Prdm16* and beige fat identity causes vascular remodeling and elevated blood pressure —M. Koenen *et al.*

PERSPECTIVE p. 237

314 Polar science

Complex mesoscale landscapes beneath Antarctica mapped from space —H. Ockenden *et al.*

PERSPECTIVE p. 235; PODCAST

ON THE COVER

Colloidal perovskite nanocrystals offer exceptional color purity and efficiency but have long been limited by poor operational stability. Vivid multicolor light waves illustrate bright, stable emission from perovskite nanocrystals protected by a hierarchical shell. This interfacial design suppresses degradation and maintains color purity during operation, enabling efficient and operationally stable light sources with strong commercial viability for high-resolution displays and optoelectronic applications. See pages 238 and 266. Credit: Yue Zhao, Qingsen Zeng, and Tae-Woo Lee

ON THE PODCAST

Reversing ecological destruction in the Galápagos, and finally mapping Antarctica's surface

WORKING LIFE

322 Growing pains —A. Lecher

Science serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.sciencemag.org; bulk rate on request.
