22 JANUARY 2026 | VOLUME 391 | ISSUE 6783

330

In Mexico, Indigenous ancestry can affect response to medications.

## EDITORIAL

### 329 States pioneer a new frontier in US science funding

—J. Alexander and I. Estabrooke

## NEWS

### 330 Mexican genome trove could guide medical decisions

Study reveals role of “fine-grained” ancestry in predicting drug response —J. E. Smith

### 332 Some guest editors pack special issues with their own articles

Thousands have penned more than one-third of a journal issue, raising conflict-of-interest concerns —J. Brainard

### 333 Purdue blocks admission of many Chinese grad students

Faculty members suggest university is overreacting to pressure from the Trump administration and Congress —J. Mervis

### 335 Hidden industry ties pervade social media research

Nearly one-third of papers in major interdisciplinary journals had undeclared ties to industry —K. Kupferschmidt

### 336 As Greenland loses ice, global sea levels will rise—and its own will fall

The island is rebounding from ice melt so fast that scientists are rethinking how Earth’s interior works —E. Howell

### 337 AI has helped scientists—but may have hurt science

Analysis finds that AI both expands individual impact and narrows collective scientific exploration —C. Zhao

## COMMENTARY

### PERSPECTIVES

### 348 Tracking space debris from sonic booms

Seismic data reveal the trajectory and break-up of space debris in Earth’s atmosphere —C. Carr

RESEARCH ARTICLE p. 412

### 349 Tethered platelets in severe infection

Platelet-derived structures in blood vessel walls increase inflammation and bleeding risk —G. Perrella and J. Rayes

RESEARCH SUMMARY p. 369

### 351 Meeting the need for myelin

Oligodendrocyte progenitor cell differentiation is constitutive across brain regions

—W. Macklin and T. Allen

RESEARCH SUMMARY p. 368

### 352 Uncovering the secrets of syphilis

Integrating archaeological, skeletal, and paleogenomic data can reveal the origins of syphilis

—M. K. Zuckerman and L. Bailey

RESEARCH SUMMARY p. 370

### POLICY FORUM

### 354 How malicious AI swarms can threaten democracy

The fusion of agentic AI and LLMs marks a new frontier in information warfare —D. T. Schroeder

### BOOKS ET AL.

### 358 Mitigating clean energy’s dirty costs

A journalist advocates for sustainable mining and empowering affected communities —E. T. Ayuk

SPECIAL ISSUE

# One year of Trump

## FEATURES

### 338 Damage assessment

Which of Donald Trump’s changes are likely to last—and which will fade? —J. Mervis

### 342 Pressure on the pipeline

The Trump administration’s agenda is likely to reshape the scientific workforce —K. Langin

### 345 Talking back

An unprecedented assault has forced the U.S. scientific community to rethink its advocacy tactics —D. Malakoff

### 347 What’s next

For Trump and science, there’s still more to come —Science News staff

## ON THE COVER

In the year since Donald Trump returned to the White House, U.S. science has experienced unprecedented disruption. In this special issue, *Science*’s news reporters take stock of the impacts on research and the scientific workforce, forecast what lies ahead, and assess the scientific community’s efforts to mitigate or reverse the harms. See the special section beginning on page 338. Illustration: Stephan Schmitz/Folio Art

371

False-color image of the dust ring around the star Fomalhaut (black region, hidden using a coronagraph). A transient source within the ring was produced by an asteroid collision.

### 359 Narratives of conflict in a warming Arctic

A journalist humanizes the rapidly changing region as global strategic interest builds —J. Spence

### LETTERS

#### 360 Editorial Expression of Concern

—H. H. Thorp

#### 360 Regulate worker heat exposure in global trade

—C. Liu *et al.*

#### 360 Safeguarding tailings dams at the climate brink

—W.-B. Ma *et al.*

## RESEARCH

### HIGHLIGHTS

**363** From *Science* and other journals

### RESEARCH SUMMARIES

#### 366 Plant reproduction

Pan-family pollen signals control an interspecific stigma barrier across Brassicaceae species —Y. Cao *et al.*

#### 367 Developmental biology

Endogenous retroviruses synthesize heterologous chimeric RNAs to reinforce human early embryo development —Y. Xiang *et al.*

#### 368 Cell biology

Myelin is repaired by constitutive differentiation of oligodendrocyte progenitors —Y. A. Mironova *et al.*  
PERSPECTIVE p. 351

#### 369 Immunology

Platelet-derived integrin- and tetraspanin-enriched tethers exacerbate severe inflammation —C. Kusch *et al.*  
PERSPECTIVE p. 349

#### 370 Ancient DNA

A 5500-year-old *Treponema pallidum* genome from Sabana de Bogotá, Colombia —D. Bozzi *et al.*  
PERSPECTIVE p. 352

### RESEARCH ARTICLES

#### 371 Asteroids

A second planetesimal collision in the Fomalhaut system —P. Kalas *et al.*

#### 374 Quantum sensing

Multiparameter estimation with an array of entangled atomic sensors —Y. Li *et al.*

#### 379 Seismic hazards

Progressive eastward rupture of the Main Marmara fault toward Istanbul —P. Martínez-Garzón *et al.*

#### 384 Atomic physics

Observation of the Einstein–de Haas effect in a Bose–Einstein condensate —H. Matsui *et al.*

#### 389 Isotope stratigraphy

143-million-year seawater osmium isotopic record: Trends, rhythms, and dynamics of volcanism and tectonics —H. Matsumoto *et al.*

#### 394 2D materials

Giant enhancement of exciton diffusion near an electronic Mott insulator —P. Upadhyay *et al.*

#### 399 Organic chemistry

Couple-close: Unified approach to semisaturated cyclic scaffolds —J. Xie *et al.*

#### 407 Ferroelectrics

Observation of one-dimensional, charged domain walls in ferroelectric  $ZrO_2$  —H. Zhong *et al.*

#### 412 Space debris

Reentry and disintegration dynamics of space debris tracked using seismic data —B. Fernando and C. Charalambous  
PERSPECTIVE p. 348; PODCAST

## WORKING LIFE

#### 418 The price of prestige

—Z. Marelja

#### 417 Science Careers

Pollinators indiscriminately disperse pollen, but a protein in Brassicaceae pollen prevents incompatible fertilization.

*Science* serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.science.org; bulk rate on request.
