NANO
Volume 19, Number 1
January 15, 2025

Cover Story
Cover Story: Inspired by the mechanical stimulation of the basal cytoneme in the Drosophila wing disc, a DNA origami cytoneme is designed to mimic the mechanical properties of its natural counterpart. It is then applied to the delivery of Dpp morphogen to the wing disc. (...) Read more

NEWS ACS NANO

Solid-Phase Molecular Self-Assembly Leading to Scale-Span Molecular Materials

Jianzhuang Jiao, Xiaoqiang Shao, Hao Tian, Junfeng Zhang, and Yan Liu*

Read time: 1 min (Published: 2025-01-14)
Publication Date (Web): January 14, 2025 (ASAP Article)

LETTERS

Engineering a Mechanoresponsive DNA Origami Cytocone for Drug Delivery to Narrowed Epithelia

Yuqing Chen, Kristina Kiseleva, Aaron Lacey, Rachel Armstrong, Alexandra Ros, and Aayush Joshi Saha*

Read time: 10 min (Published: 2025-01-14)
Publication Date (Web): January 14, 2025 (ASAP Article)

ACS Nano Explore

Asymmetric Spin Canting and Demagnetization Dynamics Driven by Laser Fields in Two-Dimensional Antiferromagnets

Shu-Li Ma, Ning Tesfaye Tsesazo, Zhuoyi Chen, and Jiaqi Han*

Read time: 10 min (Published: 2025-01-14)
Publication Date (Web): January 14, 2025 (ASAP Article)

Chirality Switching in 1T-TaS$_2$ by Highly Charged Ion Irradiation

Yuan Li, Yuan Li, Yuan Li,
