

CONTENTS

7 MAY 2026 | VOLUME 392
ISSUE 6798

581, 648
& 655

Human impacts such as climate change threaten thousands of plant species and their evolutionary history.

EDITORIAL

559 Lessons in resistance from Tim Snyder

—H. H. Thorp **PODCAST**

NEWS

562 Deep-Earth map points to a lost U.S. continent

Sensor array traces how rocks conduct electricity, revealing mineral riches, crust that can amplify solar storms, and fragments of ancient landmasses —P. Voosen

564 After pulling vaccine study, CDC leader calls for new journal

Jay Bhattacharya clashes with epidemiologists over widely used design —J. Cohen

565 Arrest of Fauci aide for records violations decried as political

David Morens's indictment centers on help he gave nonprofit that funded China research blamed for pandemic —J. Cohen

567 Chaotic whale rescue shocks marine biologists

Timmy, a humpback stranded in Germany 6 weeks ago, was freed after a media outcry. But the whale was in poor health and may already be dead —M. Enserink

569 AI scientist agents violate research integrity rules

Advanced AI systems are shown to make up data and “p-hack” their results —N. Jones

570 Magic mushroom compound shows promise against cocaine addiction

Small study that prioritized Black and low-income participants yields “remarkable” results —R. Nuwer

571 How ‘spikes’ in the epileptic brain are harmful—and might be tamed

Abnormal electrical bursts hijack neurons involved in cognition and can be predicted up to 1 second in advance, new study finds —J. E. Smith

FEATURES

572 The power of a fish

In the remote reaches of the Amazon, scientists are working with villages to protect an ecosystem while boosting the economy —W. Cornwall **PODCAST**

COMMENTARY

PERSPECTIVES

578 Forecasting volcanic eruptions across scales

Predicting future volcanic eruptions requires better understanding of crustal magma storage —M. T. Gudmundsson and C. J. Bean

580 Delivering a STING to tumors

STING agonist nanoparticles trigger potent antitumor immunity in mice and rabbits —R. Liao and D. J. Irvine **RESEARCH SUMMARY** p. 610

581 The future of plant extinction

Analyses of large-scale datasets call for urgent action to conserve plant diversity —R. A. Scherson and F. Luebert

RESEARCH ARTICLES pp. 648 & 655

582 Building an oral peptide drug

Engineered enzymes enable kilogram-scale synthesis of drug for high-cholesterol conditions —R. Buller and J. N. Pelletier

RESEARCH ARTICLE p. 643

BOOKS ET AL.

584 Bury them in bureaucracy

Indigenous challenges to Spanish colonizers shaped Latin America in profound ways, argue two historians —R. Atwood

585 Data-driven decisions in a fast-and-loose world

A journalist probes the history and future of evidence-based action
—J. Wai

LETTERS**586 Conflict imperils Middle East marine life** —H. Wang *et al.***587 The vulnerability of Middle East desalination** —M. Elimelech**587 Safeguard water infrastructure amid conflict**
—X. Xiao and Y. Tao**ANALYSIS****POLICY ARTICLE****588 Aging and the narrowing of scientific innovation**

Aging researchers and the removal of retirement policies yield decreased disruptive innovation in science —H. Cui *et al.*

REVIEWS**592 Ionic computing**

Knowledge gaps for neuromorphic ionic computing
—N. R. Aluru *et al.*

RESEARCH**HIGHLIGHTS**

602 From *Science* and other journals

RESEARCH SUMMARIES**605 Neurodegeneration**

Short RNA chaperones promote aggregation-resistant TDP-43 conformers to mitigate neurodegeneration
—K. E. Copley *et al.*

606 Molecular biology

Human DHX29 detects nonoptimal codon usage to regulate mRNA stability —F. Hia *et al.*

607 Electronic structure

A molecule with half-Möbius topology —I. Rončević *et al.*

608 Protein engineering

Rapid directed evolution guided by protein language models and epistatic interactions —V. Q. Tran *et al.*

609 Nanomaterials

Competitive reactivity drives size- and composition-focusing in multimetallic nanocrystals
—J. Yoon *et al.*

610 Immunology

Intermetallic nanoassemblies potentiate systemic STING activation —X. Zhou *et al.*

PERSPECTIVE p. 580

611 Neuroscience

Tuft dendrites in frontal motor cortex enable flexible learning
—E. Maristany de las Casas *et al.*

RESEARCH ARTICLES**612 Quantum simulation**

Ferrimagnetism of ultracold fermions in a multiband Hubbard system —M. Lebrat *et al.*

617 Earthquakes

Dynamic segmentation of the Sagaing fault —M. Liu *et al.*

624 Magnetism

Realization of a spin glass in a two-dimensional van der Waals material
—B. Pal *et al.*

629 Wildfires

Wildfire damages and the cost-effective role of forest fuel treatments —F. Strabo *et al.*

636 Polymer chemistry

Alkylidene functionalization produces highly recyclable and scalable polyhydroxyalkanoates
—L. Zhou *et al.*

643 Biocatalysis

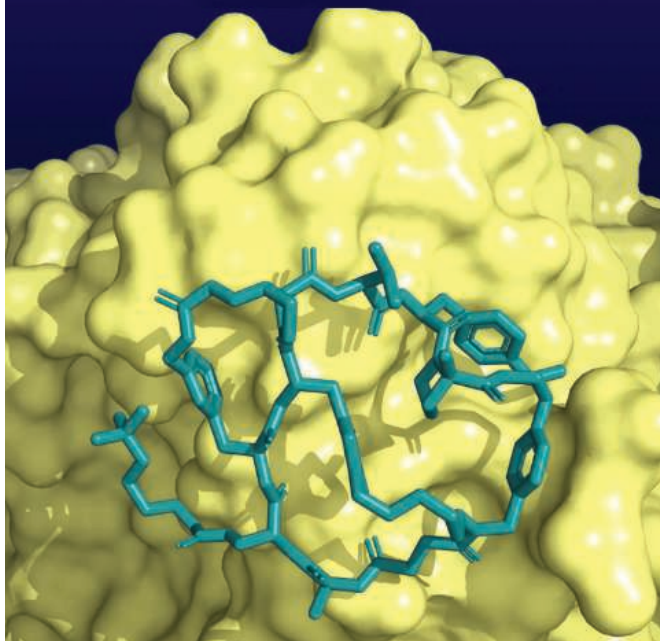

Biocatalytic cascades enable manufacture of the macrocyclic peptide enlicitide —A. Klapars *et al.*
PERSPECTIVE p. 582

ON THE COVER

A giant fish called the arapaima is the focus of a conservation success story in the Brazilian Amazon. Scientists have worked with local villages to protect the commercially valuable fish from poachers while allowing villagers to profit from a sustainable arapaima harvest. The project has spurred development and led to the protection of some 150,000 km² of tropical forest. See page 572.

582 & 643

A molecular model of the macrocyclic peptide drug enlicitide bound to its target protein, PCSK9

Science serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling, available from backissues.sciencemag.org; bulk rate on request.
