 Open Access
 18 May 2026</p> | <p>Decoding chirality at the nanoscale with momentum-space polarimetry
 Schematic illustration of Fourier-domain Mueller matrix polarimetry probing light-matter interactions in gammadion nanostructures, and enabling extraction of intrinsic chiral response for molecular enantiomer sensing.</p> <p>Jeeban Kumar Nayak, Meghna Sarkar ... Olivier J. F. Martin</p> |  |
| <p>Article
 Open Access
 18 May 2026</p> | <p>Statically foveated freeform OST-HMD system with wide FOV and high perceived resolution
 A perception-driven freeform eyepiece enables statically-foveated optical see-through head-mounted displays (OST-HMDs) with an 80° FOV and over 60 pixels per degree (PPD) peak resolution, delivering high perceived image quality while reducing pixel demand by over 35%.</p> <p>Pengyinjie Lyu & Hong Hua</p> |  |
| <p>Article
 Open Access
 18 May 2026</p> | <p>Gigahertz-rate thin-film lithium niobate receiver for time-bin quantum communication</p> <p>Andrea Bernardi, Marco Clementi ... Daniele Bajoni</p> |  |
| <p>Article
 Open Access
 12 May 2026</p> | <p>On the precision models of fringe projection profilometry: unification, simplification and connection</p> <p>Shenzhen Lv, Nengqi Huang ... Qian Kemao</p> |  |
| <p>Article
 Open Access
 11 May 2026</p> | <p>Light-induced in situ reconstruction of CoOOH-modified TiO2/CoNi-LDH heterojunction photoanode: achieving excellent photoelectrochemical cathodic protection and bacterial inactivation
 In situ reconstruction of CoNi-LDH generates CoOOH, enhancing charge transfer and ROS generation for photoelectrochemical cathodic protection and anti-biofouling.</p> <p>Meiqi Wang, Yiqing Tang ... Jing Wang</p> |  |
| <p>Article
 Open Access
 11 May 2026</p> | <p>Helical opto-thermoviscous flows drive out-of-plane rotation and particle spinning in a highly viscous micro-environment
 Focused laser scanning generates symmetry-engineered 3D thermoviscous flows for contact-free, object-agnostic out-of-plane rotation and sheathless opto-hydrodynamic focusing in highly viscous media, enabling stable micromanipulation and enhanced volumetric imaging.</p> <p>Fan Nan, Weida Liao ... Moritz Kreysing</p> |  |
| <p>Article
 Open Access
 09 May 2026</p> | <p>Surpassing kilometer-scale terahertz wireless communication beyond 300 GHz enabled by hybrid photonic-electronic synergy
 A hybrid photonic-electronic synergy integrates photonics-assisted THz generation, high-power traveling wave tube amplification, and diversity reception, enabling kilometer-scale 335 GHz wireless communication with a record 61.248 Gbit s⁻¹m rate-distance product.</p> <p>Yuancheng Cai, Lin Zhang ... Xiaohu You</p> |  |
| <p>Article
 Open Access
 09 May 2026</p> | <p>Energy extraction from dark Fe³⁺ in A2Sc2B4O14:Fe³⁺, Yb³⁺ (A = Sr, Ba) toward promoted NIR luminescence and pc-LED light source for multifunctional applications
 Robust energy extraction from dark Fe³⁺ via efficient Fe³⁺→Yb³⁺ energy transfer in A₂Sc₂B₄O₁₄:Fe³⁺, Yb³⁺ (A = Sr, Ba) phosphors yields 160-fold enhanced NIR luminescence, enabling eco-friendly pc-LEDs for versatile non-destructive inspection.</p> <p>Dechao Yu, Haisheng Liu ... Dawei Zhang</p> |  |
| <p>News & Views
 Open Access
 08 May 2026</p> | <p>On-chip solitons are gaining new colors</p> <p>Grégory Moille, Kartik Srinivasan & Yanne K. Chembo</p> |  |
| <p>News & Views
 Open Access
 08 May 2026</p> | <p>Bridging the gap in silicon photonics: quantum dot lasers and the end of the optical isolator
 Quantum dot (QD) lasers enable intrinsically feedback-tolerant, isolator-free silicon photonic integrated circuits (PICs), eliminating the bulky optical isolators traditionally required to suppress destabilizing reflections. Owing to their delta-funlike density of states, near-zero linewidth enhancement factor, and strong damping, QD lasers sustain stable, high-speed operation without coherence collapse, even under extreme optical feedback. This intrinsic resilience enables direct monolithic integration onto silicon, paving the way for compact, scalable, and CMOS-compatible optical interconnects, while accelerating the transition from laboratory demonstrations to industrial deployment.</p> <p>Shujie Pan, Junjie Yang & Siming Chen</p> |  |
| <p>News & Views
 Open Access
 08 May 2026</p> | <p>Quantum topology emerges at near field
 Near-field nanophotonics platform with spin-orbital coupling enables single-photon skyrmions with robust topological structures for high-dimensional quantum information processing.</p> <p>Zhenyu Guo & Yijie Shen</p> |  |
| <p>News & Views
 Open Access
 08 May 2026</p> | <p>Quadratic few-cycle solitons on chip</p> <p>A. V. Ermolaev, L. Emonin & J. M. Dudley</p> |  |
| <p>Article
 Open Access
 08 May 2026</p> | <p>Directional dark field for nanoscale full-field transmission X-ray microscopy
 This work presents the first directional dark-field nanoimaging method, enabling sub-resolution orientation mapping via simple TXM implementation. Its application is demonstrated on nanoporous glass and human tooth enamel nanocrystals.</p> <p>Sami Wirtensohn, Sijja Fleener ... Imke Greving</p> |  |
| <p>Article
 Open Access
 07 May 2026</p> | <p>Subarray programmable terahertz metasurface for optical logic and high-order amplitude modulation
 Subarray programmable THz metasurface using high-speed GaN HEMTs enables broadband control, 100–200 MHz optical logic, and PAM-4 modulation, delivering scalable reconfigurable THz front ends without added addressing complexity.</p> <p>Lan Wang, Sen Gong ... Yaxin Zhang</p> |  |
| <p>Article
 Open Access
 07 May 2026</p> | <p>Ion agent mitigates efficiency roll-off in near-infrared electroluminescence for practical bioimaging and information encryption
 An ionic liquid-mediated surface reconstruction strategy is developed to mitigate the severe efficiency roll-off in PQD-based NIR LEDs, achieving a record EQE of 24.8% with significantly suppressed efficiency roll-off.</p> <p>Tao Yang, Ye Wang ... Liang-Sheng Liao</p> |  |
| <p>Article
 Open Access
 06 May 2026</p> | <p>Active steering of cathodoluminescence through a generalized Smith-Purcell effect</p> <p>Eduardo J. C. Dias, A. Rodríguez Echarri ... Joel D. Cox</p> |  |
| <p>Review Article
 Open Access
 06 May 2026</p> | <p>Beyond the visible: metal-ion-doped inorganic UV phosphors for advanced photonics
 This review provides a comprehensive and systematic overview of the luminescence mechanisms, recent advances, and emerging applications of metal-ion-doped inorganic UV luminescent materials.</p> <p>Yi Zhang, Yanjie Liang ... Xiao-Jun Wang</p> |  |
| <p>Article
 Open Access
 06 May 2026</p> | <p>All-in-one optically interactive soft robots with embedded liquid crystal holography</p> <p>Zi-Chen Zhang, Yang Wei ... Yan-Qing Lu</p> |  |
| <p>Article
 Open Access
 29 Apr 2026</p> | <p>Attosecond three-stage formation and coherent exciton dynamics in a two-dimensional material under strong field
 Excitons in h-BN form within ~2.5 fs via a three-step process under resonant excitation.</p> <p>Qing Chen, Daqiang Chen ... Sheng Meng</p> |  |
| <p>Article
 Open Access
 27 Apr 2026</p> | <p>Dye-sensitized cascaded energy transfer for amplified 1525 nm luminescence in highly doped lanthanide nanoparticles
 By harvesting the energy destined for nonradiative decay and redirecting energy flux in dye-sensitized Er³⁺-based nanoparticles via an active shell (Yb³⁺), a three-order-of-magnitude enhancement in NIR-IIb emission was achieved.</p> <p>Fei Long, Dechao Gan ... Yulei Chang</p> |  |
