# 863

Acidic seepages from thawing permafrost release toxic metals into streams in central Yukon, Canada.

## EDITORIAL

### 791 Progression without progress

—J. M. Ottino and B. Uzzi

## NEWS

### 792 Scientists play catch-up to startling Ebola outbreak

Testing, sequencing, and clinical trial efforts spring to life as Bundibugyo virus spreads —K. Kupferschmidt

### 794 CDC plan to retire lab monkeys draws ire

Critics say proposal was rushed and could endanger animals slated to be moved to a Texas sanctuary —D. Grimm

### 795 Virologist accused of starting COVID-19 fights funding ban

United States seeks to debar Ralph Baric for misleading NIAID on old coronavirus studies, which he disputes —J. Cohen

### 797 Designer molecules could power quantum computers

Organic qubits controlled with light could rival atoms, ions, and crystal defects —Z. Savitsky

### 798 Making eyes 'photosynthetic' could treat major vision problem

Relocating plants' light-capturing structures to the eye may fight damage from dry eye —M. Leslie

## FEATURES

### 800 Brothers in arms

Key human defenses against pathogens were forged billions of years ago in microbial battles with viruses —R. Stone

### 804 The phages strike back

PODCAST

## COMMENTARY

### PERSPECTIVES

### 805 Tracking human mobility for wildlife conservation

Human mobility data expand ecological analyses of people's impact on wild animals —L. Beaudrot

RESEARCH ARTICLE p. 879

### 807 An appetite for protein

The fly gut integrates nutrient-specific appetite control —S. J. Simpson and D. Raubenheimer

RESEARCH SUMMARY p. 837

### 808 Can enhanced alkalinity store carbon durably?

Key questions remain about carbon removal strategies in open environmental systems —T. Isson and A. J. West

### 810 Taking plant membrane temperatures

Plasma membrane nanoclusters help plants distinguish growth-promoting warmth from damaging heat —S. J. Davis and J. Ronald

RESEARCH ARTICLE p. 885

### BOOKS ET AL.

### 812 A student takes on Stanford (and the world)

Theo Baker spills Silicon Valley secrets and revisits his efforts to expose a shocking breach of research integrity —V. Thompson

PODCAST

**814 Artificial intimacies**

A philosopher probes the promise of AI friendships  
—J. M. Szczyka

**LETTERS****815 Chile's environmental policy at risk**

—A. P. Durán *et al.*

**816 Chile's regulatory rollback harms biosphere**

—J. G. Navedo *et al.*

**816 Fisheries sector as a mitigation wedge**

—W. W. L. Cheung *et al.*

**ANALYSIS****POLICY ARTICLE****818 Generative AI use and misuse call for assessment reform in higher education**

Growing misuse of, and unequal access to, AI tools requires universities to rethink how they evaluate learning  
—I. Chirikov *et al.*

**REVIEWS****821 Sleep**

The oscillatory biology of sleep: Linkage to dementia  
—M. Nedergaard

**RESEARCH****HIGHLIGHTS**

**828** From *Science* and other journals

**RESEARCH SUMMARIES****831 Evolution**

A deep-time landscape of plant cis-regulatory sequence evolution  
—K. R. Amundson *et al.*

**832 Endocrinology**

Microglia Rank signaling regulates GnRH neuronal function and the hypothalamic-pituitary-gonadal axis  
—A. Collado-Sole *et al.*

**833 Neuroscience**

Reward magnitude determines reinforcement learning efficiency  
—S. Gong *et al.*

**834 Geomorphology**

Role of tectonic rock damage in erosional processes: A global analysis  
—B. Kuhasubbasin *et al.*

**835 Organic chemistry**

Divergent and programmable skeletal remodeling of complex macrocycles with a small method set  
—A. Nikbakht *et al.*

**836 Device technology**

Device-scaling constraints imposed by the van der Waals gap formed in two-dimensional materials  
—M. Pourfath and T. Grassler

**837 Feeding**

Complex interplay of neuronal and hormonal gut-brain responses to essential amino acid deficit  
—B. Kim *et al.*  
PERSPECTIVE p. 807

**838 Vaccines**

Mucosal vaccination in mice provides protection from diverse respiratory threats  
—H. Zhang *et al.*

**RESEARCH ARTICLES****839 Ancient DNA**

Long-distance genetic relatedness in megalithic central Europe  
—N. A. da Silva *et al.*

**845 Biogeography**

Biogeographic processes underlying global patterns of plant diversity  
—B. H. Daru *et al.*

**850 Organic chemistry**

A relay energy transfer paradigm for asymmetric photocatalyzed [4+2] cycloadditions  
—Y.-B. Wang *et al.*

**858 Exoplanets**

Cloudy mornings and clear evenings on a gas giant exoplanet  
—S. Mukherjee *et al.*

**863 Geoscience**

Abrupt stream acidification and metal mobilization from permafrost degradation  
—E. K. Skierszkan *et al.*

**868 Quantum dynamics**

Dynamics of disordered quantum systems with two- and three-dimensional tensor networks  
—J. Tindall *et al.*

**873 Magnetism**

Magnon hydrodynamics in an atomically thin ferromagnet  
—R. Xue *et al.*

**879 Movement ecology**

Interacting effects of human presence and landscape modification on birds and mammals  
—R. Y. Oliver *et al.*  
PERSPECTIVE p. 805

**ON THE COVER**

This depiction of viral threats confronting both bacteria and people, and the protein and cellular defenses arrayed against them, illustrates how human immunity traces part of its antiviral arsenal to ancient microbial predecessors. This shared defensive heritage is already suggesting novel tools for molecular biology and new approaches to medicine. See page 800.

**885 Plant science**

FERONIA orchestrates plasma membrane nanoclusters for plant thermotolerance  
—K. Wang *et al.*  
PERSPECTIVE p. 810

**WORKING LIFE****894 How making art freed my science**

—S. H. Liu

**790** Science Staff

**892** New Products

**893** Science Careers

**858**

Illustrative representation of the cloud distribution on the gas giant exoplanet WASP-94A b

*Science* serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling, available from backissues.sciencemag.org; bulk rate on request.
