1014

EDITORIAL

1003 A narrowing window to understand AI

—E. Horvitz and R. West

NEWS

1004 Proposed orbital 'airbag' would block solar storms

Gases released from satellites could slash the threat of severe space weather —P. Voosen

1006 Trump seeks tighter grip on grantmaking

Sweeping proposed rule would also restrict foreign collaborations and cut funding for open-access fees —J. Mervis

1007 Brain-mapping effort searches for roots of neurodegenerative diseases

Allen Institute initiative aims to capture earliest cellular damage underlying disease and identify new drug targets —J. E. Smith

1008 String theory is rebuilt from first principles

Physicists find that minimal assumptions about nature inevitably lead to stringlike theories —Z. Savitsky

1009 White House defangs NSF watchdog unit

New policy leaves universities in charge of probing misconduct allegations against faculty —J. Mervis

1010 Antiviral pill gets first test for Ebola prevention

Unprecedented trial aims to protect people exposed to Ebola in the DRC and Uganda —K. Kupferschmidt

1012 Threatened 'rolling stone reefs' are surprisingly diverse

DNA study reveals hidden biodiversity off Brazil—and raises alarm over oil exploration —S. Moutinho

FEATURES

1014 The last astronomers

Amid a flood of AI, astrophysicists are questioning the soul of their field —J. Sokol
PODCAST

COMMENTARY

PERSPECTIVES

1020 Ultraprocessed foods and obesity: Interpreting the evidence

What do randomized controlled trials really tell us about the effects of ultraprocessed foods? —F. Magkos *et al.*
PODCAST

1022 Bad memories, bad sleep

Sleep quality is regulated by the reactivation of memory cells —K. Inokuchi
RESEARCH SUMMARY p. 1044

1024 Ozone from wildfire plumes increases mortality

Decades of improvement in surface ozone exposure in the United States risk being reversed by wildfires —B. de Foy
RESEARCH ARTICLE p. 1088

1025 The lost social infrastructure of work

Remote work has substantially increased social isolation, with measurable consequences for mental health —E. Zang and R. O'Brien
RESEARCH SUMMARY p. 1045

BOOKS ET AL.

1027 A provocative view of evolution turns 50

The Selfish Gene continues to challenge readers half a century later —J. A. Agren

1028 Patently imperfect

To expand access to medicines, two advocates call for rethinking intellectual property's role in global health —E. Dolgin

LETTERS

1029 Editorial expression of concern —H. H. Thorp

1029 Effects of China's underground infrastructure —Q. Jiang *et al.*

1030 Wine's warning for farming in climate change —Y. Kuang and Z. Xia

1030 Aquavoltaics knowledge gaps undercut benefits —X. Liu *et al.*

ANALYSIS

POLICY ARTICLE

1032 Dual-use research under scrutiny

Strengthened US oversight of dual-use research may face growing jurisdictional limits while imposing costs on domestic science —S. Kwon

RESEARCH

HIGHLIGHTS

1036 From *Science* and other journals

The eastern segment of the Sichuan–Tibet Railway traverses a mountainous region characterized by complex hydrogeology and environmentally sensitive terrain.

RESEARCH SUMMARIES

1039 Behavioral economics
Homo cooperans: Understanding the nature of human cooperation —P. Andre *et al.*

1040 Cardiology
Severe obesity in human HFpEF alters contractile protein function and organization —V. P. Jani *et al.*

1041 Organic chemistry
Photocatalyzed oxidative cleavage of alkenes using CO₂ as an oxygen donor —Y. Qin *et al.*

1042 Remote sensing
Global extent and drivers of tree cover loss quantified with high-resolution satellite data —A. Tyukavina *et al.*

1043 Adaptation
Competition enables rapid adaptation to a warming range edge in a model plant community —T. Usui and A. L. Angert

1044 Sleep
Memory reactivation underlies experience-dependent adaptive regulation of sleep —M. Yu *et al.*
PERSPECTIVE p. 1022

1045 Personnel economics
Home alone: Remote work, isolation, and mental health —N. Emanuel *et al.*
PERSPECTIVE p. 1025

RESEARCH ARTICLES

1046 Comparative cognition
Spontaneous problem-solving in bumble bees —A. A. Bhambore *et al.*

1050 Plant immunity
Molecular mimicry of a pathogen virulence target by a plant immune receptor —D. Gómez De La Cruz *et al.*

1056 Thermoelectrics
Ultralow chromium doping enables all-PbSe thermoelectric cooling —S. Liu *et al.*

1061 Nanomaterials
Confined growth of armchair MoS₂ nanotubes at the 1-nm limit —Y. Nakanishi *et al.*

1065 Black holes
A stellar dynamical mass measurement of an inactive black hole at redshift 2 —A. B. Newman *et al.*

1069 Sustainable development
Landscape efficiency frontiers for biodiversity, climate mitigation, and net economic value —S. Polasky *et al.*

1075 Organic chemistry
Stereoretentive radical-based alkyl-alkyl cross-coupling —Y. Wang *et al.*

1082 Coastal dynamics
Unexpected expansion and regrowth in Earth's mangrove forests over the past four decades —Z. Zhang *et al.*

1088 Air pollution
Fires reverse progress toward ozone air quality standards in the United States —W. Deng *et al.*
PERSPECTIVE p. 1024

ON THE COVER

A young mangrove tree stands at the front line of the shifting boundary between land and sea in Florida Bay, Florida, USA. Four decades of satellite observations reveal that mangrove forests globally have recently shifted from net loss to net gain, with reduced degradation and continued regrowth and expansion, suggesting early signs of conservation success. See page 1082.

ON THE PODCAST

Will AI replace astronomers, how healthy are ultraprocessed foods, and a peek behind the scenes of 'The normals'

WORKING LIFE

1094 Believing I belong —S. Ghai

1093 Science Careers

Science serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.science.org; bulk rate on request. Authorization to reproduce material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act can be obtained through the Copyright Clearance Center (CCC), www.copyright.com. The identification code for *Science* is 0036-8075. *Science* is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
