News & Views Open Access 26 Jun 2026	Dopant-localized mechanoluminescence in simple oxides Ankoji Parvathala, Soo Ha Lee ... Hyeonsung Choi	
News & Views Open Access 26 Jun 2026	Reading, decrypting, and actuating with light in soft-robotic materials Sieuon Jeon & Dong Ki Yoon	
News & Views Open Access 26 Jun 2026	Surpassing kilometer-scale terahertz wireless communication beyond 300 GHz enabled by hybrid photonic–electronic synergy Mikhail Gorbun & Georgy Fedorov	
News & Views Open Access 26 Jun 2026	Towards theoretical foundation for high-precision fringe projection profilometry system design and optimization Song Zhang	
Article Open Access 26 Jun 2026	Reconfigurable ferroelectric chiral nanostructures enable fast-switchable optical spatial differentiation We propose a reconfigurable space-variant ferroelectric chiral nanostructure to dynamically control the optical differentiation. Via switching the polarity of external electric field, spatial differentiation or bright-field imaging can be actively selected with an ultra-short response time. This work advances the ingenious building of ferroelectric nanostructures, and offers an important glimpse into their potential in neuromorphic photonics, biomedical microscopy and artificial intelligence. Wen Chen, Dong Zhu ... Peng Chen	
Article Open Access 26 Jun 2026	Operando tracking of ion kinetics and state-of-charge via multiresonant fiber-optic grating sensors in sodium-ion batteries Operando monitoring of interfacial ion kinetics and real-time accurate state-of-charge quantification in sodium-ion batteries has been achieved using a compact multiresonant fiber-optic grating sensor. Xile Han, Jinliang Li ... Tuan Guo	
Article Open Access 26 Jun 2026	Practically magnetically tuned coupling strength and nonlinearity in CrSBr exciton-polaritons An exciton-polariton in the 2D magnet CrSBr has a Rabi splitting energy and a nonlinear response strongly tunable by an external magnetic field. Chun Li, Chao Shen ... Qing Zhang	
Article Open Access 26 Jun 2026	Stabilization and destabilization of multimode solitons in nonlinear degenerate multi-pass cavities Junhan Huang, Bingbing Zhu ... Zhengsheng Tao	
Article Open Access 25 Jun 2026	Multi-wavelength spin dynamics of defects in hexagonal boron nitride Different excitation wavelengths strongly influence the spin dynamics and photophysics of single spin defects in hexagonal boron nitride, enabling a threefold enhancement in ODMR contrast and magnetic field sensitivity. Ivan Zhigulin, Nicholas P. Sloane ... Igor Aharonovich	
Article Open Access 23 Jun 2026	Subambient daytime radiative cooling to mitigate haze-induced amplification of urban heat islands We theoretically develop and experimentally demonstrate guidelines for photonic designs to enable subambient daytime radiative cooling under haze-polluted skies, which highlights selective scattering of sunlight and infrared thermal emission. Minghao Dong, Qiuyu Chen ... Zhen Chen	
Article Open Access 23 Jun 2026	High-throughput in situ single particle X-ray imaging of dehydrating viral capsids Abhishek Mall, Anna Munke ... Kartik Ayer	
Article Open Access 23 Jun 2026	Towards a physics-informed network paradigm with data generation and background noise removal for different distributed acoustic sensing applications Yangyang Wan, Haotian Wang ... Zuyuan He	
Article Open Access 23 Jun 2026	High-purity linearly polarized emission from a compact BIC laser We demonstrate a linearly-polarized emission from a compact quasi-BIC laser with a high polarization extinction ratio of ~300:1, while single-mode operation and high beam quality are well-maintained. Yifan Li, Wei Guo ... Yongquan Zeng	
Article Open Access 23 Jun 2026	Deciphering optical coupled resonant systems with physics-data co-driven deep neural networks The physics-data co-driven deep neural network enables rapid and precise prediction of implicit physical parameters in complex coupled resonant systems, deciphering their underlying physical properties in a unified way. Song-Yi Liu, Hao-Tian Zhong ... Da-Quan Yang	
News & Views Open Access 22 Jun 2026	Catch and relay: brighter near-infrared photoluminescence in lanthanide-based nanoparticles An Yb ³⁺ -doped shell in lanthanide nanoparticles acts as an active energy relay, funneling the energy absorbed by ICG to Er ³⁺ ions in the core, hence boosting NIR-II emission ~2000-fold. Liyun Ming & Riccardo Marin	
Article Open Access 22 Jun 2026	Broadband opto-thermal camouflage and infrared encrypted communication via inverse design A photonic structure achieving broadband opto-thermal camouflage and infrared encrypted communication, advancing adaptive concealment and signaling. Qixiang Chen, Chengcong Li ... Dongliang Zhao	
Article Open Access 22 Jun 2026	Machine learning-assisted highly efficient thermal management in function-oriented thermochromic smart windows A physics-guided neural network is proposed to inversely design energy-efficient thermochromic windows with directional privacy protection. Zhengui Zhou, Changyuan Chen ... Yi Long	
Article Open Access 22 Jun 2026	10⁻²¹-Level optical frequency dissemination over 2067 km of noise-loaded field-deployed fiber network Bias-free digital TDC phase recording and cascaded relay stations with hertz-level purification achieve 2.9 × 10 ⁻²¹ instability over 2067 km noisy field fiber, breaking conventional limits Fa-Xi Chen, Li-Bo Li ... Jian-Wei Pan	
Research Highlight Open Access 15 Jun 2026	Sharper displays via field control Yuguang Ma	
Article Open Access 10 Jun 2026	Snapshot 3D image projection using a diffractive decoder A joint digital encoder and diffractive optical decoder enable snapshot 3D projection with high axial resolution, reduced cross-talk, and scalable volumetric display across closely spaced image planes. Çağatay Işıl, Alexander Chen ... Aydoğan Özcan
