

CONTENTS

16 JULY 2026 | VOLUME 393
ISSUE 6808

236 In Malawi, aid cuts have meant new mothers like Josephine Phiri can face long waits for care.

EDITORIAL

225 AI in scientific publishing: Slower, worse, and more expensive —H. H. Thorp

NEWS

226 As the Arctic warms, gray whale boom turns into a bust
Scientists point to changes that jeopardize the marine mammals' critical feeding grounds —W. Cornwall

228 In a billion-dollar gamble, NSF bets on research with an economic payoff
New X-Labs initiative aims to develop breakthrough technologies—but academics aren't sure they are welcome —J. Mervis

229 NSF bans almost all research collaborations with China
Agency drops attempt to mitigate risk in favor of outright prohibition on working with most Chinese research institutions —J. Mervis

230 Scandinavian radar array will probe mysteries of the aurora
EISCAT_3D will paint a new picture of the upper atmosphere as it is roiled by solar outbursts —R. Stone

232 U.S. researchers express outrage over proposed changes to managing federal grants
White House receives 340,000 comments on rules many fear would politicize science —J. Mervis

233 Tree-killing beetle is spreading to urban forests around the world
As researchers piece together the pest's global trek, countries are working to contain the growing threat —E. Pennisi

234 Spain's largest research body confronts its dark past
Spanish National Research Council has published the stories of some 500 staff purged under Francisco Franco's dictatorship —E. Pain

FEATURES

236 An uncertain path
After the shocks of 2025, Malawi is rethinking its relationship to foreign aid—and trying to protect dramatic gains in maternal health —C. Offord
PODCAST

COMMENTARY

PERSPECTIVES

242 Lymph nodes now optional
A subset of dendritic cells orchestrates the formation of tertiary lymphoid structures in tumor tissues —W. K. Decker
RESEARCH SUMMARY p. 263

243 Recovering lost origins
Integrated evidence helps triangulate the origins of African slaves buried on St Helena —R. A. Bentley
RESEARCH SUMMARY p. 262

244 Tidying up aging organs
A prostaglandin prevents macrophages from clearing toxic neutrophils in aging organs —G. A. FitzGerald
RESEARCH SUMMARY p. 264

246 Bringing radioactive molecules to the table

A compact source of radioactive molecules could enable new tests of fundamental physics —L. Caldwell
RESEARCH ARTICLE p. 319

LETTERS

247 Seabed mining requires timely governance —C. Rühlemann

248 Social calibration of sycophantic AI —S. Meng

248 Response —M. Cheng *et al.*

ANALYSIS

POLICY ARTICLE

249 The rise and fall of the Amazon Soy Moratorium
Challenges to the voluntary zero-deforestation pact could impose costs for forests and the soy sector —L. Rausch *et al.*

300
Sediment cores sampling the now-exposed regions of the Aral Sea basin show how drying has caused large carbon fluxes from desiccated terrains there.

PRIZE ESSAY

252 Regaining your voice

AI speech neuroprostheses can restore day-to-day communication after neurological injury
—S. Stavisky

RESEARCH

HIGHLIGHTS

255 From *Science* and other journals

RESEARCH SUMMARIES

258 Transcriptomics

Cross-cohort analysis of expression and splicing quantitative trait loci in TOPMed —P. Orchard *et al.*

259 Cell biology

A transcriptional biosensor reveals mechanisms of α -ketoglutarate signaling to chromatin
—A. C. Sternisha *et al.*

260 Seismology

Cyclic sealing and drainage on an oceanic transform fault
—H. Yang *et al.*

261 Immunology

Direct interaction of V δ 7 TCRs with IL17RA drives the differentiation of T_H1-like $\gamma\delta$ T cells —K. Ye *et al.*

262 Archaeology

Tracing the origins of St Helena's liberated Africans —X. Wang *et al.*
PERSPECTIVE p. 243

263 Cancer immunology

Dendritic cells control tertiary lymphoid structure development and maintenance in cancer
—R. Mattiuz *et al.*
PERSPECTIVE p. 242

264 Aging

Restored clearance of senescent neutrophils by tissue-resident macrophages limits organ aging
—Y. J. Tan *et al.*
PERSPECTIVE p. 244

RESEARCH ARTICLES

265 Paleontology

Performance trade-offs define a fundamental dental dichotomy in mammals —N. Chatar *et al.*

272 Electronic materials

Surface-dominant transport in Weyl semimetal NbAs nanowires for next-generation interconnects —Y. Cheon *et al.*

280 Nanomaterials

Geometrically driven reversible solid-liquid phase transition at the atomic scale —W. Cui *et al.*

287 Solar cells

Spatiotemporally homogeneous crystallization for ambient scalable perovskite photovoltaics —B. Gao *et al.*

294 Quantum engineering

Robust single-electron memory with quantum states manipulation —C. Liu *et al.*

300 Carbon cycle

Drying of the Aral Sea reshapes the anthropogenic carbon inventory of Central Asia
—R. Marcé *et al.*

306 Neurophysiology

Parallel independent voltage computing along dendrites of CA3 pyramidal neurons
—A. Noguchi *et al.*

313 Protein engineering

Structure and evolution-guided design of minimal RNA-guided nucleases —P. Skopintsev *et al.*

319 Molecular physics

Production and spectroscopy of cold radioactive molecules
—C. J. Conn *et al.*
PERSPECTIVE p. 246

ON THE COVER

The image shows skulls and lower jaws from several living and extinct mammal species, highlighting differences in size, shape, and feeding adaptations. Featured specimens include an extinct saber-toothed cat alongside extant species. This subset highlights specimens that were specialized in either crushing or slicing as well as a species of civet that was balanced in both functions. See page 265.

325 Science Careers

Science serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated. *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): \$165 (\$74 allocated to subscription). Domestic institutional subscription (51 issues): \$3125; Foreign postage extra: Air assist delivery: \$135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090-6178. Single-copy sales: \$15 each plus shipping and handling available from backissues.science.org; bulk rate on request. Authorization to reproduce material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act can be obtained through the Copyright Clearance Center (CCC), www.copyright.com. The identification code for *Science* is 0036-8075. *Science* is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
