Article Open Access 21 Jul 2026	<u>Approaching the low optical loss limit of plasmonics using potassium</u> The potassium film, fabricated via a rapid slipping-assisted oxide-free crystallization process, achieves the lowest optical loss measured in metals to date, while simultaneously maintaining deeply subwavelength confinement of optical mode. Yi Zhang, Yuhan Yang ... Lin Zhou	
Article Open Access 21 Jul 2026	<u>Hybrid deep reconstruction for vignetting-free upconversion imaging through scattering in epsilon-near-zero materials</u> We propose a hybrid imaging pipeline integrating a nonlinear epsilon-near-zero time gate with deep learning to reconstruct high-fidelity images through severe scattering media for future advanced biomedical and in-solution diagnostics. Hao Zhang, Yang Xu ... Sergio Carbajo	
Article Open Access 20 Jul 2026	<u>Programmable rotation of single cells along arbitrary axes via opto-thermo-osmotic torque</u> Tailored optical patterns generate reconfigurable opto-thermo-osmotic torque for programmable rotation of single cells along arbitrary axes. Siyan Huang, Zhihan Chen & Yuebing Zheng	
Article Open Access 19 Jul 2026	<u>Topological Jackiw-Rebbi states in photonic Van der Waals heterostructures</u> Topological van der Waals WS ₂ photonic gratings host confined Jackiw-Rebbi states, yielding directional modes and 22x enhanced WSe ₂ monolayer emission. Sam A. Randerson, Paul Bouteyre ... Alexander I. Tartakovskii	
News & Views Open Access 17 Jul 2026	<u>Optical anisotropy enables skyrmions for robust information encoding</u> Ziyu Zhan, Qiang Liu & Xing Fu	
Article Open Access 17 Jul 2026	<u>A nanocrystal-based PN junction model for quantum dot light-emitting diodes</u> By developing a modified nano-PN junction model, we can correlate the current-voltage curves of QLED with the corresponding sub-devices of functional layers. Hui Bao, Seyed Mehdi Sattari-Esfahlan & Haizheng Zhong	
Article Open Access 17 Jul 2026	<u>All-optical computing towards 100-GHz clock rates</u> We demonstrate an ultrafast all-optical computer which greatly exceeds the limited clock rates of current electronic computers. Gordon H. Y. Li, Midya Parto ... Alireza Marandi	
Article Open Access 15 Jul 2026	<u>Spin-multiplexed point spread function engineering via dielectric metasurface for simultaneous optical differentiation and high-resolution imaging</u> Through spin-multiplexed point spread function engineering, this work demonstrates single-layer metasurface optical differentiators that simultaneously achieve high-resolution imaging and on-demand, arbitrary-order differentiation without additional optics. Niu Liu, Zhelin Lin ... Cheng Zhang	
Article Open Access 15 Jul 2026	<u>Two-photon interference between independent atomic and quantum dot single-photon sources for hybrid quantum network</u> Indistinguishable photons from atomic and quantum dot systems enable two-photon interference without spectral modification, providing a practical route toward scalable hybrid quantum networks. Kyu-Young Kim, Heewoo Kim ... Han Seb Moon	
Article Open Access 15 Jul 2026	<u>Self-aligned heterogeneous quantum photonic integration</u> A self-aligned heterogeneous photonic integration method was developed to combine solid-state quantum emitters and spins with integrated photonics at low insertion loss, advancing scalable quantum photonic technologies. Kinfung Ngan, Yeeun Choi ... Shuo Sun	
News & Views Open Access 14 Jul 2026	<u>Bridging the gap in flat optics: the dawn of partially nonlocal metasurfaces</u> Jingxuan Wei & Yong Liu	
Article Open Access 14 Jul 2026	<u>Optical singularity protractor for rotating metrology with neuromorphic sensing</u> By integrating neuromorphic computing with topological structured light, this work propose a sensing technique that utilizes the angular velocity of singularities to directly reflect the rotation speed of optical field. Zhe Weng, Yiyu Zhao ... Hui-Tian Wang	
Article Open Access 14 Jul 2026	<u>Background-free quantitative phase imaging with adaptive-optics surface plasmon resonance holographic microscopy</u> Siqing Dai, Mengmeng Zhang ... Jianlin Zhao	
Article Open Access 14 Jul 2026	<u>Spontaneous formation and optical manipulation of a woven domain fabric in a ferroelectric crystal</u> Feifei Xin, Yehonatan Gelpok ... Eugenio DelRe	
Article Open Access 13 Jul 2026	<u>Impacts of particle morphology and rotation on optical manipulation</u> Weicheng Yi, Yuzhi Shi ... Xinbin Cheng	
Editorial Open Access 10 Jul 2026	<u>A new beacon for optics: Light Office in Türkiye and its opening forum</u> By integrating neuromorphic computing with topological structured light, this work propose a sensing technique that utilizes the angular velocity of singularities to directly reflect the rotation speed of optical field. Chenzi Guo, Yuhong Bai & Sedat Nizamoğlu	
Light People Open Access 10 Jul 2026	<u>Light People: Prof. Zhanshan Wang</u> Qiushi Huang & Rongjun Zhang	
Article Open Access 10 Jul 2026	<u>Effective Rabi frequency in ultrafast semiconductor lasers: self-starting harmonic frequency combs</u> We derive an Effective Rabi Frequency (ERF) for semiconductor lasers and explain harmonic frequency comb formation in quantum cascade lasers as a resonance between ERF and a cavity mode, that makes the latter undamped. Carlo Silvestri, Franco Prati ... Lorenzo Luigi Colombo	
Article Open Access 10 Jul 2026	<u>Tunable resonant metasurfaces enabled by atomically thin semiconductors</u> Voltage-tunable hybrid metasurfaces integrating 2D transition metal dichalcogenides with photonic bound states in the continuum enable dynamic control of light-matter interaction and polarization-dependent optical responses for analog photonic applications. Alexey Ustinov, Ángela Barreda ... Isabelle Staudé	
Article Open Access 10 Jul 2026	<u>Integrated photonic polarization synthesizer and analyzer</u> A single photonic integrated circuit enables both generation and analysis of arbitrary optical polarization states using a polarization-splitting grating coupler and reconfigurable Mach-Zehnder interferometer mesh, eliminating external polarization optics. Carson G. Valdez, Anna J. Miller ... Olav Solgaard
