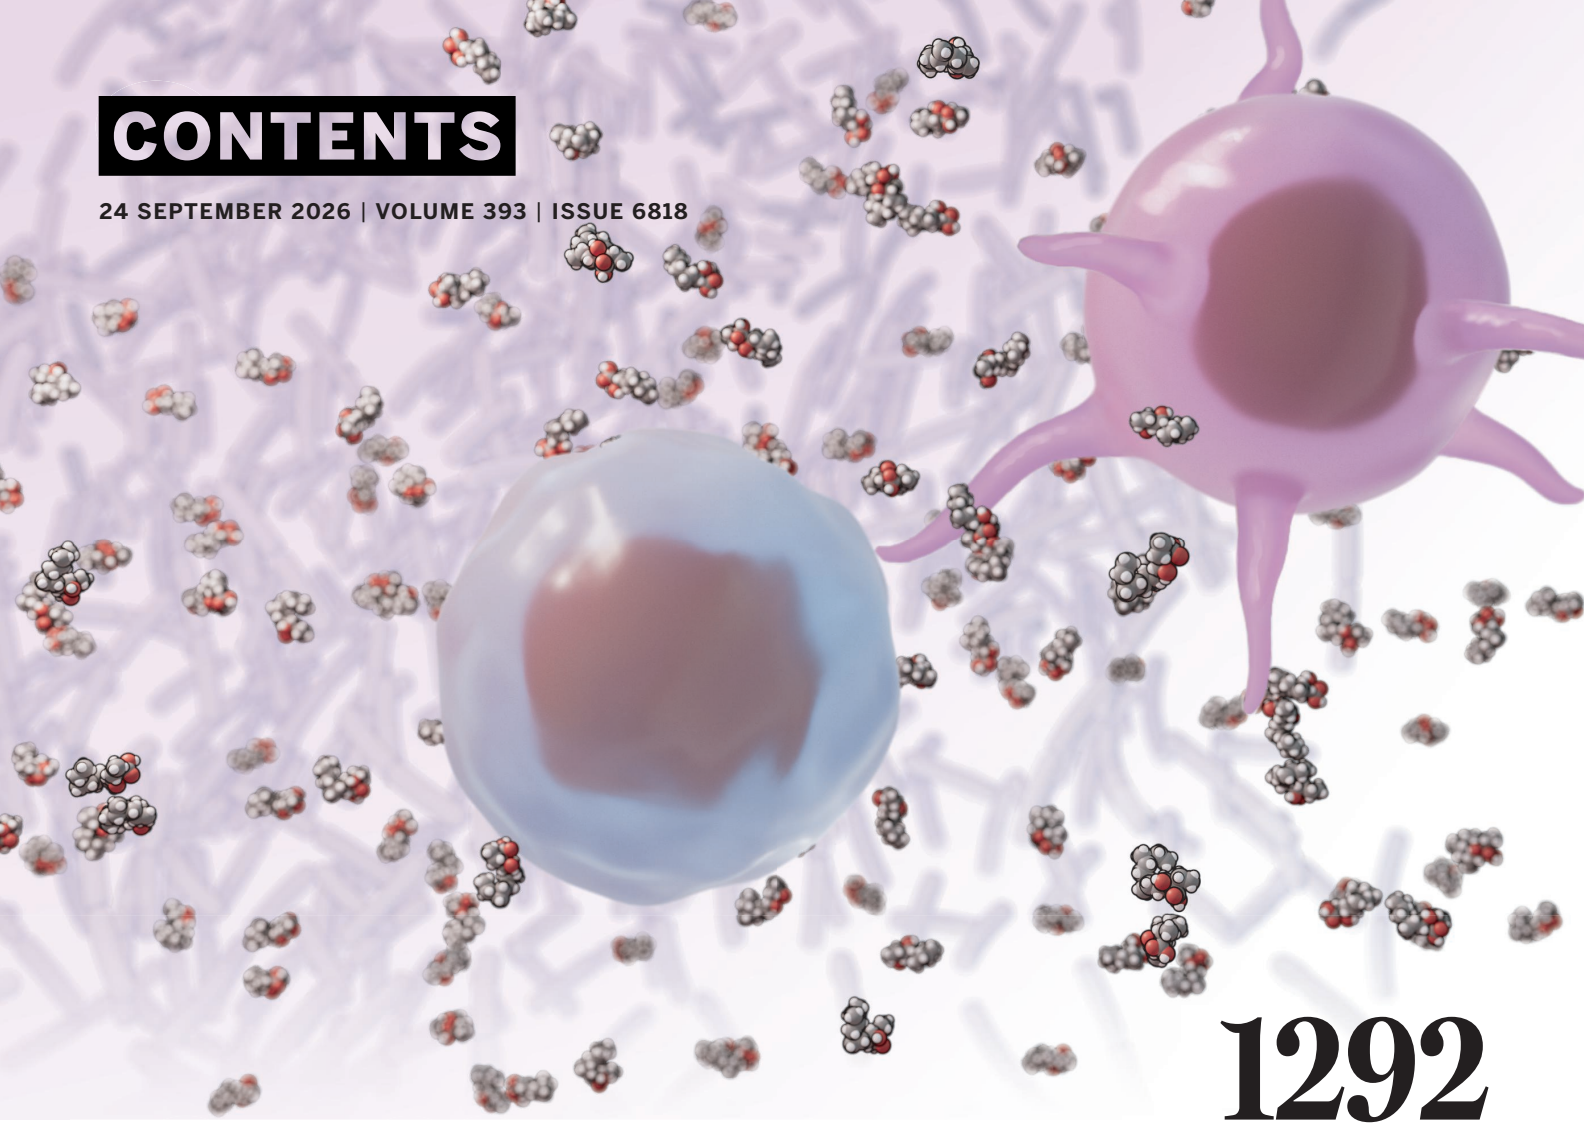
CONTENTS

24 SEPTEMBER 2026 | VOLUME 393 | ISSUE 6818



1292

EDITORIAL

1277 Hedging El Niño isn't the same as adapting to it
—J. S. Mankin

1279 Science still has expertise; what it's lost is authority —H. H. Thorp

NEWS

1284 Satellite reveals a world of altered rivers
SWOT is exposing how humans reshape rivers—and challenging models used to predict floods —P. Voosen

1286 Why AI agents invent their own language if you let them chat
"Weird terms" are a natural—but disturbing—byproduct of agent swarms —T. Howarth
PODCAST

1288 Single wildfire smoke exposure causes lasting harm, natural experiment in monkeys hints
Infant macaques showed immune changes and signs of faster aging years after inhaling smoke —S. Reardon

1289 Giant cuttlefish's stunning mating aggregation decimated by toxic algae off Australia
Algal bloom has almost wiped out a unique population of the meter-long cephalopod —E. Stokstad

1290 White House efforts to control NIH grants lead to new court challenge and Oval Office tussle
Lawsuit argues political screening of grants violates researchers' freedom of speech —J. Kaiser

FEATURES

1292 Alternative immunity
A little-known arm of the immune system respond to lipids, with a protein called CD1 driving reactions to bee stings, bacteria, and possibly poison ivy —M. Leslie

COMMENTARY

PERSPECTIVES

1296 Observation and exploration widen the menu
Orangutans expand their foraging skills by combining observation with trial-and-error learning —N. Truskanov
RESEARCH ARTICLE p. 1369

1298 Finding hidden factors of a battery's life
Two new descriptors enable precise evaluation of rechargeable lithium-metal battery performance —B. J. Hwang
RESEARCH SUMMARY p. 1314

1299 Nanotherapy against senescence
Targeting senescence decreases fibrosis and boosts the response of cancer cells to immunotherapy —M. D'Ambrosio and J. Gil
RESEARCH SUMMARY p. 1313

1300 King sulfur
Mammalian cells produce and store a sulfur compound for antioxidant protection —R. Possemato
RESEARCH SUMMARY p. 1315

POLICY FORUM

1302 Enhancing Europe's competitiveness by empowering researchers as innovators
Overlooked opportunities can help turn academic research into socioeconomic impact across Europe —A. K. A. Silva Brun *et al.*

BOOKS ET AL.

1305 How not to lose the science race
The postwar scientific boom that transformed medicine shows how the US built its edge—and could lose it —E. Dolgin

LETTERS

1306 Oil pollution threatens the Strait of Hormuz
—M. Irannezhad *et al.*

1306 Ecological risks of the Taklamakan project
—K. Xie and Z. Yang

1307 Life in Science: Research at gunpoint —D. Coelho *et al.*

RESEARCH

HIGHLIGHTS

1308 From *Science* and other journals

RESEARCH SUMMARIES

1311 Cancer
Ceramide synthesis mediates colorectal cancer metastasis through a YAP-driven regenerative program —S. Goswami *et al.*

1312 Cardiology
Targeting an atypical G protein–coupled receptor signaling pathway for cardiac fibrosis therapy —H. Zhang *et al.*

1313 Nanomedicine
Senescence-directed nanotherapy ameliorates fibrosis and overcomes immune exclusion in cancer
—C. Hinterleitner *et al.*
PERSPECTIVE p. 1299

1314 Batteries
Unlocking cycle life of lithium metal batteries —Z. Li *et al.*
PERSPECTIVE p. 1298

1315 Biochemistry
Mammals produce *cyclo*-octasulfur to suppress lipid peroxidation and ferroptosis
—U. Barayeu *et al.*
PERSPECTIVE p. 1300

1316 2D materials
2D theoretically twistable material database —Y. Jiang *et al.*
RESEARCH ARTICLE p. 1317

RESEARCH ARTICLES

1317 2D materials
Two-dimensional topological quantum chemistry and catalog of topological materials
—U. Petralanda *et al.*
RESEARCH SUMMARY p. 1316

1322 Bioelectronics
An in-body networking system for communication between wearable and implantable therapeutics
—R. Ghanim *et al.*

1329 Solar cells
Prussian blue regulates ion dynamics in perovskite solar cells —F. Cao *et al.*

1335 Pig genomics
Ancient introgression drives wild boar expansion and phenotypic diversification of domestic pigs
—J.-H. Chen *et al.*

1342 Evolution
Escape of the *BC200* gene to a human poxvirus reveals its persistent transposition in primates —P. Gao *et al.*

1347 Immunology
Fibroblasts restrain gut inflammation by IGF1-dependent regulation of innate lymphocytes
—Q. Lin *et al.*

1354 Comparative cognition
Neural evidence that dogs segment the speech they hear with a humanlike consonant bias —B. Morvai *et al.*

1359 Organic chemistry
Embracing triplet nitrenes for C-to-N replacement of complex bicyclic (hetero)aryl azides
—D.-I. Park *et al.*

1364 Solar cells
Conformal oxides decouple chemical stability and energetics at NiO_x/perovskite interfaces
—C. Xie *et al.*

ON THE COVER

Learning over an extended childhood has been fundamental to survival during human evolutionary history. Researchers show how Sumatran orangutans use their 8 years of dependency to master a broad diet, necessary for independent survival. They find that infants have individual tendencies to engage in social and individual learning, which together determine diet profile breadth acquired by independence. The finding offers insights into the evolutionary roots of the complex learning mechanisms that characterize humans. See pages 1296 and 1369. Photo: Suzi Eszterhas/Minden

1369 Learning
How 8 years of social and individual learning interact to shape ecological competence in orangutans
—T. Revathe *et al.*
PERSPECTIVE p. 1296

WORKING LIFE

1378 No need to pretend
—J. Lin

1278 *Science* Staff
1375 AAAS News & Notes
1377 *Science* Careers

Science **serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated.** *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): $165 ($74 allocated to subscription). Domestic institutional subscription (51 issues): $3125; Foreign postage extra: Air assist delivery: $135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. **Printed in the U.S.A. Change of address:** Allow 4 weeks, giving old and new addresses and 8-digit account number. **Postmaster:** Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090–6178. **Single-copy sales:** $15 each plus shipping and handling available from backissues.sciencemag.org; bulk rate on request. **Authorization to reproduce** material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act can be obtained through the Copyright Clearance Center (CCC), www.copyright.com.
