ON THE COVER

Glucagon-like peptide–1 (GLP-1) receptor agonists are among the most effective treatments for obesity and other metabolic disorders. With widespread use of these drugs, it has become clear that their effects go well beyond health conditions traditionally linked to metabolism, affecting multiple other organ systems, particularly the brain. Continued research in this field has also expanded beyond the GLP-1 receptor as a target, with the development of additional drugs and combinations to help optimize patient care. See the special section beginning on page 608. Illustration: C. Bickel/*Science*

ON THE PODCAST

GLP-1 targets beyond obesity, and misusing brain data

ILLUSTRATION: C. BICKEL/*SCIENCE*

SPECIAL ISSUE

GLP-1 and beyond

INTRODUCTION

608 Going beyond GLP-1
The growing complexity of targeting metabolism
—Y. Nusinovich *et al.* PODCAST

PERSPECTIVES

610 GLP-1 receptor agonists in addiction therapy
Use of GLP-1–based therapies for addiction could provide a bridge toward whole-person health care
—N. D. Volkow and E.M. Wargo˜PODCAST

612 GLP-1 therapies and cancer risk
Correct interpretation of evidence is essential in a rapidly evolving medical landscape
—B. Hicks and A. Pottegård

POLICY FORUM

614 Expanding global access to GLP-1s: Challenges and opportunities
Generic drugs may expand access, but newer therapies could create a two-tier global market
—K. C. Shadlen and O. J. Wouters

REVIEWS

618 When fat adapts: From physiological remodeling to disease —K. Drareni and P. Seale

626 Obesity management medications: The way forward —M. Blüher

633 Obesity pharmacotherapies and cognition —S. Börchers *et al.*

EDITORIAL

575 Can artificial intelligence align with Indigenous science?
—Y. Running Horse Collin

NEWS

576 U.S. archaeology faces 'apocalyptic' threat
Congress and the White House are moving to weaken key law that requires preproject reviews
—T. Mitchell Brown

578 AI cracks a 27-year-old pillar of computer science
The result, one of three major claims from OpenAI, raises questions about sharing of AI-generated work
—T. Howarth

579 Experiment in orbit produces the coldest temperature ever
Record-setting Bose-Einstein condensate created by atom traps nested like Russian dolls —A. Cho
RESEARCH ARTICLE BY W. XIONG *ET AL*. 10.1126/SCIENCE.AEA5324

581 Serbia elects the world's brainiest parliament
Dozens of academics become politicians after student group's stunning victory, raising hopes for reforms —M. Tatalović and N. Jarić Dauenhauer

582 Natural hydrogen prospectors struggle to find commercial deposits
Deep French borehole points to an alternative: extracting hydrogen dissolved in groundwater
—P. Voosen

583 DNA confirms barbarian tribe's mythic tale about its origins
The Goths believed they swept south from Scandinavia centuries before sacking Rome. Skeletons from across Europe say they were right
—A. Curry

FEATURES

586 The scramble for your brain data
Companies are using wearable neurotechnologies to train AI models of the brain—without telling users
—J. Moens PODCAST

591 Watching the weary brain
Construction and mining companies are using fatigue-monitoring devices to improve safety. But critics say these technologies threaten workers' privacy —J. Moens

COMMENTARY

PERSPECTIVES

594 How do faults recover after giant earthquakes?
Long-term monitoring reveals how a fault relocks for a future earthquake after a massive rupture
—K. M. Johnson
RESEARCH ARTICLE p. 676

596 Privacy, accuracy, and objectivity of census data
A new algorithm for protecting privacy can improve the accuracy of population statistics —J. P. Reiter
RESEARCH ARTICLE p. 686

597 Modeling word learning, child by child
A computational approach to learning reproduced key features of child language development
—Z. Harmon and C. F. Rowland
RESEARCH SUMMARY p. 648

598 The power of noise
Noise measurements untangle a decades-old puzzle in high-temperature superconductivity
—D. Morr
RESEARCH ARTICLE p. 682

BOOKS ET AL.

600 A cultural history of altered artifacts
New tools feed humanity's ancient impulse to embellish and self-aggrandize, but future scholars will be prepared —A. S. Rumsey

LETTERS

602 Start cryosphere flood warnings at the source —C. Song

603 Biodiversity-inclusive urban planning in China
—N. Wang *et al.*

604 China's farmland needs clean water drainage —Z. Wang

PRIZE ESSAY

606 The science of the individual
A new paradigm for behavior change is tested —P. Soyster

607 When soil is left undisturbed
Conservation agriculture reframes farming, risk, and resilience in Africa
—W. Mulimbi

RESEARCH

HIGHLIGHTS

642 From *Science* and other journals

RESEARCH SUMMARIES

645 Drug discovery
Discovering molecular modulators with nanoswitch screening
—C. H. Hansen *et al.*

646 Cancer
Tumor metastasis co-opts liver hematopoiesis to promote immunosuppression —Q. Pan *et al.*

647 Metabolism
Targeting hormone conversion through dietary fiber improves polyendocrine metabolic ovarian syndrome —X. Qi *et al.*

648 Language learning
The first 1000 days: Modeling language learning from individual children's everyday speech
—H. Raviv *et al.*
PERSPECTIVE p. 597

RESEARCH ARTICLES

649 Anthropology
Direct evidence for psychoactive cannabis use 2800 years ago
—G. Caspari *et al.*

654 Paleoclimate
Glacial abrupt transitions in ocean circulation were much slower than ice-core records imply
—X. Dong *et al.*

660 Noise pollution
Echoes of the Anthropocene: Noise pollution as a global threat
—H. P. Kunc and R. Schmidt

665 Quantum simulation
Quantum gas microscopy of three-flavor Hubbard systems
—J. Mongkolkiattichai *et al.*

670 Elastocalorics
Stacked porous NiTi structure with low cost and ultrahigh fatigue life for elastocaloric cooling
—C. Su *et al.*

676 Earthquake cycle
Seafloor geodesy delineates fast megathrust relocking after the giant 2011 Tohoku earthquake
—F. Tomita *et al.*
PERSPECTIVE p. 594

682 Superconductivity
Equivalence of pseudogap and pairing energy in a cuprate high-temperature superconductor
—J. Niu *et al.*
PERSPECTIVE p. 598

686 Census data
Denoising the US Census: Succinct block hierarchical regression
—B. Ghazi *et al.*
PERSPECTIVE p. 596

WORKING LIFE

694 Breaks in the clouds
—B. Masoudi

693 *Science* Careers

Science **serves as a forum for discussion of important issues related to the advancement of science by publishing material on which a consensus has been reached as well as including the presentation of minority or conflicting points of view. Accordingly, all articles published in *Science*—including editorials, news, commentary, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by AAAS or the institutions with which the authors are affiliated.** *Science* (ISSN 0036-8075) is published weekly on Thursday, except last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2026 by the American Association for the Advancement of Science. The title *Science* is a registered trademark of the AAAS. Domestic individual membership, including subscription (12 months): $165 ($74 allocated to subscription). Domestic institutional subscription (51 issues): $3125; Foreign postage extra: Air assist delivery: $135. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #125488122. Publications Mail Agreement Number 1069624. **Printed in the U.S.A. Change of address:** Allow 4 weeks, giving old and new addresses and 8-digit account number. **Postmaster:** Send change of address to AAAS, P.O. Box 96178, Washington, DC 20090–6178. **Single-copy sales:** $15 each plus shipping and handling available from backissues.sciencemag.org; bulk rate on request. **Authorization to reproduce** material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act can be obtained through the Copyright Clearance Center (CCC), www.copyright.com. The identification code for *Science* is 0036-8075. *Science* is indexed in the Reader's Guide to Periodical Literature and in several specialized indexes.
