758

Sonar experiments in a Canadian fjord captured the breaching onset of submarine landslides.

EDITORIAL

701 Tracking danger on the peaks
—M. Jackson and A. Thapa

NEWS

702 Researchers have a wish list. Can the new Congress deliver?
Despite a healthy majority, Democrats face limits on what they can achieve —J. Mervis

703 Californians approve controversial $8.4 billion immunotherapy initiative
—P. Jacobs

704 AI research deepens mystery of cellular 'vaults'
Work guided by Claude shows bacteria and viruses likely make the odd structures, suggesting ancient origins —J. Travis

706 Novel gene therapy lets drug dampen brain cell activity, reducing seizures
In first clinical result using "chemogenetic" strategy, a team in China treated three patients to control epilepsy —A. McWhinnie

707 Neurons in a dish are the newest computing machines
Brain organoids offer highly efficient processing—if researchers can learn how to harness their power
—S. Reardon

709 Prolific infectious diseases group draws scrutiny
Critics question Pathogen Hunters's massive global sampling efforts and baffling genetic data
—J. Cohen

FEATURES

712 The sideshow
How an unpopular hypothesis linking Alzheimer's disease to the loss of crucial neurons made a comeback
—J. E. Smith PODCAST

COMMENTARY

PERSPECTIVES

716 The devastating impact of humans on elephants' social life
Human-driven habitat changes threaten the social behavior and survival of endangered species
—S. F. Hope and J. M. Plotnik
RESEARCH ARTICLE p. 792

718 Tuning the immune ecosystem to treat cancer
Engineering the immune cell milieu around tumors could make them more sensitive to immunotherapy
—M. R. Olson
RESEARCH SUMMARY p. 741

719 Oxygen tells the tale of Earth's carbon sinks
New observations suggest more carbon absorption by ocean but less by land —R. Séférian and L. Bopp
RESEARCH ARTICLE p. 799

720 Budding without an ESCRT
Condensates help drive the budding of vesicles from the tips of cilia —J. G. Carlton
RESEARCH SUMMARY p. 740

POLICY FORUM

722 Fixing the power transmission crisis
Experimentation, learning, and existing regulatory and technology options could help align stakeholders —M. Yozwiak *et al.*

BOOKS ET AL.

726 Tales from the Viking dead
Burials offer unexpected insights into medieval Scandinavian society
—A. Winroth

727 Mysticism meets empiricism
Alchemy was not a barrier to modern chemistry but a necessary stage of its development, maintains a historian —N. Pohl

CONTENTS

LETTERS

728 Coordinate protection for transboundary fishes
—D. Li and X. Shi

729 US water protection maps undercount wetlands
—Z. Tang and J. Jahangeer

729 Editor's note —H. H. Thorp

PRIZE ESSAY

730 Thermal infrared pollination by beetles
Heat from thermogenic plants serves as a signal to pollinators
—W. A. Valencia-Montoya

RESEARCH

HIGHLIGHTS

733 From *Science* and other journals

RESEARCH SUMMARIES

736 Adaptation
Limited genomic predictability of complex trait evolution despite genotype-phenotype stability
—J. A. Smiley-Rhodes *et al.*

737 Cell biology
TMEM184 proteins are Ca^{2+} uptake transporters in lysosomes
—W. Cai *et al.*

738 Immunology
A trapped catalytic product acts as molecular glue for innate immune signalosome assembly
—Q. Liu *et al.*

739 Cancer genomics
The genetic landscape of canine tumors: Insights from the Canine Cancer Genome Atlas (CCGA)
—E. Mazzone *et al.*

740 Cell biology
ESCRT-0 condensation and cargo clustering drive extracellular vesicle budding from cilia —M. Zhu *et al.*
PERSPECTIVE p. 720

741 Cancer immunology
Differentiation of stem-like $CD4^+$ T cells modulates early effector responses in colorectal cancer
—Y. Zhang *et al.*
PERSPECTIVE p. 718

RESEARCH ARTICLES

742 Astrochemistry
Carbon dioxide and amorphous water ices in the debris disk around β Pictoris —S. K. Betti *et al.*

746 Anthropology
Poisoned hunting weapons, megafauna, and plant use at a 125,000-year-old Arabian paleolakeshore
—C. Clarkson *et al.*

752 Antarctica
Geodetic observations in West Antarctica reveal geodynamically consistent 3D mantle viscosity
—D. L. dePolo *et al.*

758 Coastal processes
Direct monitoring of breaching in deltaic submarine landslides
—R. G. Englert *et al.*

763 Materials science
Antiferroelectric hafnia down to the 2D limit —X. Li *et al.*

768 2D materials
Giant elastoresistance in magic-angle twisted bilayer graphene —X. Ma *et al.*

773 Nitrogen pollution
Climate aridity amplifies global riverine nitrate beyond human inputs —K. Sadayappan and L. Li

779 Bioengineering
AI-monitored bioadhesive for sutureless microvascular anastomosis —F. Xue *et al.*

786 2D materials
Quantitative measurement of viscosity in two-dimensional electron fluids
—Y. Zeng *et al.*

792 Social networks
Increased demographic turnover and isolation precede social fragmentation in Asian elephants
—A. E. Madsen *et al.*
PERSPECTIVE p. 716

799 Carbon cycle
Atmospheric O_2 reveals a strengthening ocean carbon sink and a stagnant net land sink since 1990 —E. J. Morgan *et al.*
PERSPECTIVE p. 719

ON THE COVER

Wild Asian elephants often form lasting social relationships, relying on one another for mutual care and support. However, these social groups are now at risk of unraveling owing to declining numbers. Observations conducted over more than a decade indicate that some endangered Asian elephant populations may have crossed a critical tipping point, resulting in greater social fragmentation and isolation. See pages 716 and 792. Photo: Yashpal Rathore/NPL/Minden
